20 **WHEREAS**, flowing north, the Ocklawaha River is the primary
21 tributary for the St. Johns River, which flows through the heart of
22 Jacksonville, Florida; and

23 **WHEREAS**, the Ocklawaha River has suffered severe ecological
24 damage in the 20th century from impoundment, fertilizer runoff,
25 dredging, pollution and rerouting, all of which has directly impacted
26 recreational and economic development in the surrounding counties;
27 and

28 **WHEREAS**, House Bill 981 and Senate Bill 1066, also known as the
29 "Northeast Florida Rivers, Springs, and Community Investment Act"
30 (the "Act"), create a new Section 373.464, *Florida Statutes*, to
31 address restoration of the Ocklawaha River and creation of

1 recreational and economic development opportunities in the
2 surrounding areas; and

3 **WHEREAS**, in furtherance of the above, the Act, in part, requires:
4 (1) development of a project plan for the restoration of the Ocklawaha
5 River, (2) development of an outdoor recreation plan that identifies
6 and implements projects for enhanced and expanded river and springs
7 access for recreational activities, and (3) establishment of a
8 Northeast Florida River and Springs Recreation and Economic
9 Development Advisory Council (the "Advisory Council") to make
10 recommendations for projects to be included in the outdoor recreation
11 plan in addition to other responsibilities relative to recreational
12 and economic development in the counties surrounding the Ocklawaha
13 River; and

14 **WHEREAS**, the Jacksonville City Council supports the purpose and

20 be comprised of individuals from river recreation-related businesses
21 local to the counties impacted, members of the Florida Fish and

24 is implemented appropriately in light of the distinct needs of the
25 communities in those counties that will be most directly impacted;
26 and

27 **WHEREAS**, the Jacksonville City Council also recognizes the
28 importance of the Act's requirement for creation of an outdoor
29 recreation plan which must identify and implement projects for
30 enhanced and expanded river and springs access for recreational
31 activities, such as fishing, hunting, swimming, wildlife viewing,

1 paddling, and hiking while also requiring public input prior to
2 implementation; and

4 bordering the Rodman Reservoir, to receive additional support and
5 technical assistance through an economic development program that
6 supports projects that encourage job creation, capital investment,
7 and strengthening and diversification of each county's economy; and

8 **WHEREAS**, restoration of the Ocklawaha River would provide
9 natural flood storage and water filtration to the St. Johns River and
10 its fish and wildlife habitats, would increase the resiliency of
