| APPLICANT'S INFORMATION (if different from owner) | |
|---|--------------------------|
| 14. Name: | 15. E-mail: |
| 16. Address (including city, state, zip): | 17. Preferred Telephone: |

CRITERIA

Section 656.101(a), Ordinance Code, defines an administrative deviation as "a relaxation of the terms of the Zoning Code requirements for minimum lot area, yards, number of off-street parking spaces, landscaping, maximum lot coverage and maximum height of structures, including fences, which the Zoning Administrator is authorized to grant pursuant to the procedures set forth in Section 656.109(e) through (j)."

Section 656.109(e) through (j), Ordinance Code, provides that, with respect to action upon Applications for Administrative Deviations, the Zoning Administrator shall grant a deviation only if substantial competent evidence exists to support a positive finding based on each of the following criteria:

- 1. The need for the proposed deviation arises out of the physical surroundings, shape, topographic condition or other physical or environmental conditions that are limited to the subject property alone; or this issue is common to numerous sites.*
- 1. There are practical or economic difficulties in carrying out the strict letter of the regulation;*
- 2. The request is not based exclusively upon a desire to reduce the cost of developing the site, but would accomplish some result that is in the public interest, such as, for example, furthering the preservation of natural resources by saving a tree or trees.*
- 3. The proposed deviation will not substantially diminish property values in, nor alter the essential character of, the area surrounding the site and will not substantially interfere with or injure the rights of others whose property would be affected by the deviation;*
- 4. The proposed deviation will not be detrimental to the public health, safety or welfare, result in additional public expense, the creation of nuisances, or conflict with any other applicable law;*
- 5. The proposed deviation has been recommended by a City landscape architect, if the deviation is to reduce required landscaping; and*
- 6. The effect of the proposed deviation is in harmony with the spirit and intent of the Zoning Code.*

If the deviation is proposed to correct an existing violation, the Zoning Administrator shall also consider the following:

- (i) Whether the violation was created by the applicant with the intent to violate the provisions of this Zoning Code;*
- (ii) The length of time the violation has existed without receiving a citation; and*
- (iii) Whether the violation occurred as a result of construct on which occurred prior to the acquisition of the property by the owner.*

18. Given the above definition of an "administrative deviation" and the aforementioned criteria by which the request will be reviewed against, please describe the reason that the deviation is being sought. Provide as much information as you can; you may attach a separate sheet if necessary. Please note that failure by the applicant to adequately substantiate the need for the deviation and to meet the criteria set forth above may result in a denial.

SUBMITTAL

This application must be typed or printed in ink and submitted along with three (3) copies for a total of **four (4) applications**. Each application must include all required attachments.

Submit applications to:
Planning and Development Department, Zoning Section
214 North Hogan Street, 2nd Floor
Jacksonville, Florida 32202
(904) 255 8300

I am seeking an administrative deviation for this property to be able to build a house beside the current house that is on the property. I am going to live in the current house on the property and I am wanting to be able to build a house for my mother to be able to live beside me. I have talked to several people in the zoning and city planning departments and I was told that lineal consanguinity would be an option, but to be fully protected years down the road that I needed to apply for this administrative deviation.

I am needing this waiver for the width of the lot for the house that I will build. Although the lot meets the minimum square footage requirements for a second house the lot is 114.55 feet wide and it is my understanding for two houses with RLD-60 zoning you need 120 feet. I am wanting to be able to reduce the required lot width for the house that I will build from 60 to 54.55 feet.
