RE: Spring Glen Circle Landscape Project 2025

Liberty Landscape Supply is pleased to have the opportunity to submit the following landscape design and estimated costs for the transformation of Spring Park/Spring Glen Traffic Circle.

Currently the traffic circle has several palms that are declining and weed infested lawn that needs replacement. They are no signs of irrigation, but highly suggested for the success of this project. Exposed manhole and sewer are in the lawn area along with support cables to the power pole. We would like to disguise these in the beds and still provide access. The Canary Island Date Palm will be a large field grown specimen and centerpiece in the circle.

The scope of work for the project would include.

- Removal and disposal of lawn and any predetermined palms that are in decline.
- Layout new bed lines and bed preparation.
- Install irrigation per design. TBD.
- Supply, deliver and install NC Boulder raised wall in the center of the bed.
- Install the potting mix and top-soil as needed.
- Supply, deliver and install palms and plants per design.
- Install steel edging around beds and weed mat landscape fabric.
- Install mulch or river rock inside side beds
- Install a new lawn. Variety TBD.
 - Note: option is Synthetic Turf for lawn area. The average cost is \$25 per sf.

The design and estimated costs are based on installation of irrigation. If you would like a revised plan without irrigation and drought tolerant arid-type landscape, please let us know. Please note these are the estimated costs and all prices are subject to change.

- **Estimated costs \$45,750.00**

We hope this will help with your plans and approval to start the project. If you have any questions or like clarifications, please don't hesitate to contact me.

Best Regards,

Jay McCord,

Senior Landscape Designer and Horticulture Specialist
