**RE: Planning Commission Advisory Report
Ordinance No. 2019-425**

Application No. L-5349-18A

Dear Honorable Council President Wilson, Honorable Council Member and LUZ Chairman Becton and Honorable Members of the City Council:

Pursuant to the provisions of Section 650.405 *Planning Commission Advisory Recommendation and Public Hearing*, the Planning Commission **APPROVED Subject to Revised Site Specific FLUE Policy 4.4.12** Ordinance 2019-425 on August 22, 2019.

- **P&DD Recommendation:** Approve Subject to Revised Site Specific FLUE Policy 4.4.12
- **PC Issues:** None. However, there was one speaker that expressed opposition in regards to the proposed LDR land use designation based on the understanding that future development plans will include other land uses.
- **PC Vote:** **6-0 APPROVE Subject to Revised Site Specific FLUE Policy 4.4.12**

Revised Future Land Use Element (FLUE) Policy 4.4.12

In accordance with Ordinance 2019-424, which designates a 2,512 acre LDR land use category on the Future Land Map, the owner or authorized agent shall develop a conceptual long-term master plan addressing the entire 2,512 acre site. The LDR land use category and companion rezoning are intended to be holding categories prior to the development of the long-term master plan. The conceptual master plan, and proposed revisions or amendments to the approved plan, shall be subject to review and approval by the Planning Commission prior to submittal of land development reviews and approvals. It is the intention of the owner to amend the Future Land Map to land use designations and companion rezonings consistent with the master plan. However, approximately 250 acres of the site can be developed or rezoned prior to approval of the conceptual master plan. Revisions or amendments to the plan that do not change the approved densities or intensities may be administratively modified by the Planning and Development Department. Development

within the site shall be consistent with the conceptual master plan. The conceptual master plan shall, at a minimum, address the following conditions:

1. The general distribution, location and densities/intensities of residential and non-residential—(if anticipated) development;
2. Acknowledgement that future land use map amendments and rezonings will be ~~required~~ submitted where such uses and densities are inconsistent with the current land use and/or zoning designations;
3. The general distribution and location of conservation areas and wetland buffers;
4. The strategy for providing centralized utilities for water and sewer service throughout the planning area.
5. Identification of the major internal transportation facilities necessary to serve the future land uses through an efficient and connected network;
6. General identification of how the major internal transportation facilities will connect to the external transportation network.

The approved conceptual master plan shall be on file with the Planning and Development Department and posted on the Department’s website.
