

Project Title:	Traffic Signalization - Fiber Optic	Council District(s):	Countywide
Project Location:	Countywide	Project Number:	010405
Department:	Public Works	Program Area:	Roads / Infrastructure / Transportation
Ordinance No.:	BT No.:	Useful Life:	20 years
		Project Completion Date:	Ongoing

Project Description:

The project will provide communications to the traffic signals along selected City arterials. A communication link to a traffic signal controller will allow for remote assessment of signal issues, provide automated warning for power outages, allow for video capability, and remote real time observation of the intersection and corridor.

Justification:

A communication link to a traffic signal controller will allow for remote assessment of signal issues, provide automated warning for power outages, allow for video capability, and remote real time observation of the intersection and corridor. Fiber communications will allow for a more rapid assessment and reduced labor costs.

Project Title:	Roadway Sign Stripe And Signal	Council District(s):	Countywide
Project Location:	Countywide	Project Number:	001022
Department:	Public Works	Program Area:	Roads / Infrastructure / Transportation
Ordinance No.:	BT No.:	Project Completion Date:	Ongoing
	Useful Life:		

Project Description:

This project supports the Traffic Engineering Division's county-wide effort to re-stripe and re-sign deficient roadways. Additional efforts include signal repair and replacement or enhancement of traffic signal equipment.

Justification:

Roadways that lack or are missing lane lines/lane control markings (arrows, etc.) are difficult to traverse with opposing traffic. Drivers are exposed to side swipe and off set head on collisions. Turns and curves are critical segments that require clear lane delineation. Repair of signalized intersections is critical in providing traffic control during weekday peak periods. Signs are replaced as reflectivity is reduced. Regulatory signs and school zones are critical locations. Signs useful life: 10 years, Signal useful life: 8 years, Striping useful life: 6 years.

Project Title:	Countywide Intersection Imp-Intersection	Council District(s):	Countywide
Project Location:	Countywide	Project Number:	001132
Department:	Public Works	Program Area:	Roads / Infrastructure / Transportation
Ordinance No.:	BT No.:	Useful Life:	Project Completion Date:
		20 years	Ongoing

Project Description:

This allocation funds county-wide enhancements to City intersections. The enhancements are focused on City intersection capacity and safety improvements to ensure appropriate transportation operations throughout Jacksonville. The Public Works Department has developed a prioritization process to identify the most necessary needs. The scope of any specific intersection project funded within a CRA boundary shall be clearly defined at the time of identification of such project. This scope clarification is applicable to funds remaining from prior year, as well as current year

Justification:

Locations experiencing noticeable volumes of crashes may be improved with corrective measures that will mitigate targeted crash types and crash/conflict contributing factors. The work is usually minor and improvement plans are selected based on anticipated reduction in crashes or elimination of factors that contribute to crashes. It provides flexibility to address unforeseen needs rapidly, since the funding is already in place. The CIP scope clarification is necessary to avoid conflict with CRA projects.

Project Title:	Monument Rd Pedestrian Crossing	Council District(s):	1
Project Location:	Monument Rd at 444 Monument Rd	Project Number:	010625
Department:	Public Works	Program Area:	Roads / Infrastructure / Transportation
Ordinance No.:	2022-681-E	BT No.:	
		Useful Life:	
		Project Completion Date:	

Project Description:

Many pedestrians including children were observed attempting to cross Monument Road at this dangerous location. Monument Road is a high-volume 5-lane roadway that is not safe for pedestrians to cross at uncontrolled locations. Pedestrians walk to the Target Shopping Center north of Atlantic Blvd. This project will install a Pedestrian Hybrid Beacon or a Pedestrian Signal to create a safe pedestrian at the Target at 444 Monument Road.

Justification:

Jacksonville is consistently listed as one of the most dangerous cities for pedestrians. This project will improve pedestrian safety.

Project Title:	St Johns Bluff Rd and Lost Pine Dr Signalized U-Turn	Council District(s):	4
Project Location:	St Johns Bluff Rd and Lost Pine Dr	Project Number:	011082
Department:	Public Works	Program Area:	Roads / Infrastructure / Transportation
Ordinance No.:	2025-218-E BT No.:	Useful Life:	15 years
		Project Completion Date:	

Project Description:
 This project installs a signalized U-turn at the intersection of St. Johns Bluff Rd. and Lost Pine Dr. It will reduce congestion and improve safety.

Justification:
 A signalized U-turn is needed at the intersection of St. Johns Bluff Rd. and Lost Pine Dr. to reduce congestion and increase safety. There is a heavy U-turn movement at this intersection because of school traffic. The U-turns often back up into the thru lanes on St. Johns Bluff Rd. causing congestion, frustration, and increasing the chance of crashes.

Project Title: Golfair Blvd & APR Academy Pedestrian Crossing **Council District(s):** 10
Project Location: Golfair Blvd and Baldwin Ln **Project Number:** 011253
Department: Public Works **Program Area:** Roads / Infrastructure / Transportation
Ordinance No.: **BT No.:** **Useful Life:** 25 years **Project Completion Date:**

Project Description:
 Design and construction of a safe pedestrian crossing, (HAWK), for students walking to A. Phillip Randolph Career Academy on Golfair Blvd.

Justification:
 Golfair is a busy 4-lane, undivided road with high speeds. This project will provide a safer crossing for students.

Project Title: Overhead Pedestrian Signal - Soutel Drive at Morris Manor **Council District(s):** 10
Project Location: Soutel Drive at Morris Manor **Project Number:** 011252
Department: Public Works **Program Area:** Roads / Infrastructure / Transportation
Ordinance No.: **BT No.:** **Useful Life:** 25 years **Project Completion Date:**

Project Description:
 Upgrade the existing marked crossing at Soutel Dr. and Morris Manor to a HAWK.

Justification:
 The existing RRFB crossing is not effective and potentially hazardous. The existing crossing does not meet modern standards. Soutel Dr. is 4-lanes undivided—the most dangerous type of road for pedestrians and roadway characteristics encourage speeding. Many residents of Morris Manor, a senior living facility, need to cross here to get to a bus stop and grocery store. Upgrading this to a HAWK will improve pedestrian mobility and safety.

Project Title: Fort Caroline Road Fiber Optic **Council District(s):** 1
Project Location: Fort Caroline Rd **Project Number:** 011240
Department: Public Works **Program Area:** Roads / Infrastructure / Transportation
Ordinance No.: **BT No.:** **Useful Life:** 40 years **Project Completion Date:**

Project Description:

Installation of fiber optic communications between the traffic signals on Fort Caroline Rd and the county transportation management center.

Justification:

This installation will allow the Traffic Engineering Division to remotely monitor and respond quickly to signal outages, address problems proactively, coordinate with JSO, EOC, FDOT for traffic control more quickly, and provide a much better level of service to residents.
