JAX Ash Site Pollution Remediation	The ash remediation program is a Superfund Site composed of four areas of the City where municipal solid waste was burned in an incinerator as a method of treatment to render the material inert prior to disposal. The incinerator ash was deposited in areas of Jacksonville in the early to mid 1900's and consists of approximately 3,700+ sites in four areas: Browns Dump, Forest Street, 5th and Cleveland and Lonnie Miller. Due to the inefficient technology of the time, the solid waste materials were not rendered inert and resulted to contain elevated levels of heavy metals and poly nuclear aromatic hydrocarbons above federal regulatory levels. The approved remediation method is to excavate the upper two feet of soil, replace with clean backfill, place institutional and engineering controls on the parcel. The ash is used as daily cover for the Trail Ridge Landfill. The program is overseen by the EPA and administered by the Solid Waste Division. Leachate Evaporator - Landfill Gas Fueled Lea	Trail Ridge & North Duval Municipal Landfills generate a significant amount of leachate that requires disposal. Leachate is collected in storage tanks, transported by tanker truck to JEA's Buckman St Wastewater Treatment Plant and is causing permit exceedances where JEA is requiring the City to pay higher disposal fees to compensate for the added work to keep the facility in compliance. Construction of an evaporator unit using the landfill gas generated by the expansion area for leachate disposal will provide an offset to the ever increasing leachate disposal costs. Trail Ridge Landfill Const. and Expansion	Trail Ridge Landfill has only 4 years of air space left for the disposal of solid waste; with 18 months of operational air space. The site has approximately 977 acres of which 400 are occupied by existing landfill footprint and supporting infrastructure. The remaining 577 acres are located to the north of the current disposal hill. The landfill expansion into this 577 acre area will provide landfill capacity to Duval County residents at the current lowest feasible disposal cost for approximately 33 years of capacity. The expansion of the existing hill to the north into the first disposal unit, along the north face of the current hill will capture a "valley" and provide \$1150 million in new revenue to the City for the first 5-10 years of operations. The hill is approaching the time frame when there will be no space available for the placement of the ash materials the City is required to dispose of per the Consent Decree with US EPA. Loss of the hill as the disposal site due to capacity constraints would result in an increased cost of \$15-\$20,000,000 to the ash program. Underdrain Replacements	Underdrain is a drainage system installed under a road to collect and transport subsurface ground water. These buried conduits are usually wrapped in geotextile fabric which allow water to enter the underdrain while keeping sediments out. Underdrain is installed to keep the groundwater (protect) from coming in contact with the roadway subgrade and base.	CIP 2023-505-E	FY 23-24	FY 24-25	FY 25-26	FY 26-27	FY 27-28	Beyond 5th

Adopted by the North Florida TPO on November 14, 2019

Other Arterial funds improvements on the part of the State Highway System (SHS) that is not designated as part of the Strategic Intermodal System (SIS) Projects and programs eligible for funding include:

- Construction and improvement projects on state and federal roadways which are not on the Strategic Intermodal System (SIS), including projects that:
 - Add capacity;
 - Improve highway geometry;
 - Provide grade separations; and
 - Improve turning movements through signalization improvements and storage capacity within turn lanes.
- Acquisition of land which is acquired to support the SHS highway and bridge construction programs, and land acquired in advance of construction to avoid escalating land costs and prepare for long-range development;
- Construction and traffic operations improvements on certain local government roads that add capacity, reconstruct existing facilities, improve highway geometrics (e.g., curvature), provide grade separations, and improve turning movements through signalization improvements and adding storage capacity within turn lanes; and
- Acquisition of land necessary to support the construction program for certain local government roads, as discussed immediately above.

Strategic Intermodal System (SIS) Funds

Shown in Present Day Costs

Adopted by the North Florida TPO on November 14, 2019

The Strategic Intermodal System (SIS) is Florida's high priority network of transportation facilities important to the state's economy and mobility. The Governor and Legislature established the SIS in 2003 to focus the state's limited transportation resources on the facilities most significant for interregional, interstate, and international travel. The SIS is the state's highest priority for transportation capacity investments and a primary focus for implementing the Florida Transportation Plan (FTP), the state's long-range transportation vision and policy plan.

SIS funds may be used on the following types of projects:

- Construction, improvements, and associated right of way on SIS highways (i.e., Interstate, the Turnpike, other toll roads, and other facilities designed to serve interstate and interregional commerce including SIS connectors).

Path Forward 2045

ADOPTED 2045 Cost Feasible Plan

Bridge Replacement Program

Adopted by the North Florida TPO on November 14, 2019

This proposed program would create a new bridge discretionary grant program, administered by the U.S. Secretary of Transportation, to improve the nation's bridge conditions by leveraging state, local and private funding sources.

Bridge Investment Program

Facility	County	From	To	Improvement
Hart Bridge	Duval	South Bank	North Bank	Bridge replacement
Mathews Bridge	Duval	South Bank	North Bank	Bridge replacement
Main Street Bridge	Duval	South Bank	North Bank	Bridge replacement

These bridges are being included in the L RTP for potential funding under the new Bridge Investment Program that is included in the proposed transportation reauthorization proposal - the "America's Transportation Infrastructure Act of 2019"
