PURPOSE: White Paper (Explain Why this legislation is necessary? Provide; Who, What, When, Where, How and the Impact.) Council Research will complete this form for Council introduced legislation and the Administration is responsible for all other legislation. (Minimum of 350 words - Maximum of 1 page.)

The purpose of this legislation is to seek City Council approval for a renewal/modification Certificate of Public Convenience and Necessity ("CON") for Greenland Biomass, LLC. Greenland Biomass, LLC is an existing yard trash CON facility and has requested to add clean debris (concrete/brick/block and similar materials) to their accepted waste stream and to increase the volume of incoming materials and hence council action is required for this type of modification. In accordance with Chapter 380, Part 1 Ordinance Code, Greenland Biomass, LLC has applied for a renewal/modification CON for the operation of a clean debris and yard trash recycling facility located at 11651 Davis Creek Road East, Jacksonville, Florida. The application has been reviewed by the Public Works Department, the Solid Waste Division, the Environmental Quality Division, the Planning and Development Department and the Florida Department of Health in Duval County and the applicant requirements for operation of such a facility have been met. Final approval of a CON facility modification involving the change of acceptable waste stream is based upon the determination of need by the City Council. The proposed Greenland Biomass, LLC clean debris and yard trash recycling facility is a private facility and the operation of the facility will not require any City of Jacksonville funding. Clean debris and yard trash recycling are beneficial to Duval County's recycling goals. Recycled yard trash is commonly utilized as mulch for landscaping purposes or utilized as boiler fuel or landfill cover material while recycled clean debris (crushed concrete) is commonly utilized in various aspects of construction projects.
