2025 me	eeting to allow the introduction of I rize the Mayor and Corporate Sec	ED) is requesting MBRC consideration at the November 10, legislation to the City Council at the November 25th meeting cretary to draft a Cost Share Agreement between the City			
JEA and the City will enter into an agreement to fund the installation of temporary guy wires for existing poles and the installation of new poles in its high-voltage electrical corridor which runs north-south and along Interstate 10 at Cecil Commerce Center. The need for the modifications to the JEA power distribution network is so that the City can construct the previously approved rail which will traverse the corridor.					
JEA has been a crucial partner in the redevelopment of the Cecil Commerce Center and has worked with the OED and the Department of Public Works to solve for conflicts related to the rail construction and the power distribution network. In so doing, the cost for the relocation of poles and guy-wires is estimated to be \$513,013. However, the City and JEA are agreeing to a project cost of up to \$600,000 to be paid by the City. Should there be overruns in excess of \$600,000, the Office of Economic Development will bring that amount back to the City Council for approvals.					
end of J		ed to commence in early January and be completed by the equirements of the State of Florida grant and ensure that the ed.
