Bill Type and Number: Ordinance 2022-874

Introducer/Sponsor(s): Council President at the request of the Mayor and by Council Member Salem

Date of Introduction: November 22, 2022

Committee(s) of Reference: NCSPHS, R, F, TEU, Waterways Commission

Date of Analysis: November 24, 2022

Type of Action: Authorizing commercial paper borrowing; authorizing loan of borrowed funds, authorizing revolving line of credit; authorizing grant of funds to be appropriated in the future; amending budget ordinance attachments; authorizing execution of loan and grant agreements; invoking Procurement Code direct contracting exemption; designating oversight agency

Bill Summary: The bill appropriates \$17.5 million in commercial paper borrowing and authorizes a \$12.5 million loan to the Jacksonville Port Authority and a \$5 million revolving line of credit to be used toward the completion of the Fulton Cut Power Line Raising project. The funds are authorized to carry-over to fiscal year 2025-26. It also states the City's commitment to provide \$10 million in grant funds to the project in future fiscal years, subject to Council appropriation. The FY22-23 budget ordinance is amended to replace Second Revised Schedule B-4 (FY22-23 Debt Management Fund Detail) with a Third Revised schedule to reflect the funding for this project. The bill authorizes the negotiation and execution of an agreement between the City and Jaxport for the loan, grant and revolving line of credit. It invokes the Procurement Code exemption to allow direct contracting with Jaxport to perform the project without a competitive bidding process. The Finance and Administration Department is designated as the oversight agency for the project.

Background Information: The estimated cost of the project is between \$42.5 and \$45 million. Jaxport has secured a multiyear commitment from the Florida Department of Transportation for up to \$22.5 million and the City commits to fund up to \$22.5 million. Any costs in excess of the City's \$22.5 million commitment will be borne by Jaxport. The City's \$12.5 million loan will carry a 10-year term at 3.5% and the revolving line of credit will carry an interest rate equal to the City's then-cost of its commercial paper program. The loan term will commence no sooner than FY24-25 and after it is funded in full, the loan will amortize over 10 years with biannual payments of principal and interest. The grants are contemplated as 3 consecutive grants in the amounts of \$3.5 million, \$4 million and \$2.5 million beginning in FY23-24. The City will only provide funding after receiving disbursement requests from Jaxport with appropriate supporting documentation.

Policy Impact Area: Economic development; Jaxport operational improvement

Fiscal Impact: The City commits to providing up to \$27.5 million via a combination of loans and grants over multiple fiscal years.

Fourth Revised Exhibit "A"

PROPOSAL

Manatee Protection Project

Continuation

City of Jacksonville

Duval County, Florida

October 1, 2022 - September 30, 2023

Prepared by:

Gerard Pinto, Ph.D.

Jacksonville University Jacksonville, FL 32211 I. General Information.

Request for Proposal from: City of Jacksonville, Florida Waterways Commission

Subject: Maintaining a Comprehensive Database for a

Manatee Management Protection Plan and Manatee Awareness Program; Consultant to Waterways

Commission on Water related matters

Location: Duval County, Florida

II. A. Background and General Information.

This proposal is to continue the contract to maintain the comprehensive database for the

Duval County Manatee Protection Plan that was approved by the State of Florida. This proposal

is for the period of October 1, 2022, to September 30, 2023.

The City of Jacksonville has embarked on a focused vision to activate the St. Johns River

with extensive effort to promote development and increase boating activity on the St. Johns River.

The Florida Manatee (Trichechus manatus) is Florida's state marine mammal and is a significant

concern to the people of Duval County, as well as the entire state. Throughout Florida, the manatee,

which is protected under state and federal law, has suffered increasing mortality with the majority

of the deaths repeatedly related to boating activities. Northeast Florida, including Duval County,

has shown a general decline in manatee deaths over the past several years.

The St. Johns River provides habitat for the manatee along with supporting tremendous

recreational and industrial use. Boat traffic in the river is very diverse. It includes port facilities for

large industrial and commercial shippers, commercial fishing, sport fishing and recreational

activity. More than 200 large commercial boats/ships per month enter and exit the mouth of the

St. Johns River in Duval County with the number expected to increase over the next decade with

the possible deepening of the port channel. These vessels represent a significant economic factor

for Duval County and the entire First Coast. In addition, there are almost 30,000 recreational boats registered in Duval County.

A wide range of manatee usage of the St. Johns River has been observed. Manatees are most often seen traveling or moving from one location to another. Manatees were also observed feeding, cavorting/mating, and resting. Distribution varies throughout the year with sightings of manatees during the late winter season being uncommon. Manatee abundance in Duval County waters increased during the spring and peaked during the late summer (Valade 1991, White 2002). Jacksonville University has conducted additional studies to build a significant database to be used to develop a Manatee Management Plan.

The large amount of boating activity on the St. Johns River and the number of manatees that has -been documented using the river make it critical that a comprehensive management plan for the waters of Duval County be enacted to protect both manatee and human activity. We have been accumulating information on the manatee usage of the St. Johns River in an effort to provide a complete database and foundation for a comprehensive management plan. Several areas of research are necessary to continue to document the habitat, manatee usage and human usage of the St. Johns River.

Jacksonville University has been gathering existing information concerning manatee behavior and natural history, including studies performed by various state, county, and city agencies, along with universities and consultants. Studies on boaters including industrial, commercial spor,t and commercial fishing and recreation have also been included in the database.

Although a diverse amount of information exists concerning the manatee, very little information exists on the effects of boating on the manatee population. This proposal will expand the Manatee Awareness Program and examine boating activity on manatee behavior.

II. B. Description of Project.

This proposal outlines a "Scope of Services" for the continuation of the Manatee Protection Plan. The study/project is to continue to assemble and analyze an information database in order to update the management plan so that it continues to provide adequate protection for all concerned. In addition, public support of the plan can be enhanced through education and input from concerned citizens and industries.

In addition, this proposal includes environmental consulting services to the Waterways Commission on water-related issues concerning the St. Johns River, its tributaries and near-shore waters of the Atlantic Ocean. Any additional scope of services can be negotiated on a per-need cost basis.

III. Scope of Work.

Meeting Convened: 1:00 pm

Commissioner Barker called the meeting to order. Brian Burket, Parks Department, went over the list of projects recommended by the parks staff to apply for in the FY 2023. Mr. Burket reviewed the dual-year process of design/permitting and construction, and the annual funding cap which is \$1.9 million for FY 23. The following four FIND projects were recommended by Parks staff: Oak Harbor Boat Ramp Bulkhead (construction), St. Johns Marina boardwalk (construction), Sisters Creek floating dock extension and bathhouse (design), and Downtown Dredge sites (design). Commissioners Haskell, Birtalan, Hartley, Fraden and Barker voted unanimously to approve the staff recommendations for 2023 FIND Projects.

The group discussed four back up projects, in case the approved staff recommendations were not selected for funding. The commissioners chose the Mandarin Park Boat Ramp expansion, Joe Carlucci Boat Ramp Fishing Structure, Trout River Fishing Bridge north pier and Wayne B. Stevens dock improvements as back-up projects. Commissioners Haskell, Birtalan, Hartley, Fraden and Barker voted unanimously to approve the four back-up proposals for 2023 FIND Projects, if needed.

Before the meeting adjourned, Ms. Haskell sked about the completion of the Zoo dock. Mr. Burket said the pier portion is completed and they are waiting on delivery of dock parts, and it expected to be finished by Christmas.

JACKSONVILLE WATERWAYS COMMISSION SHOALING COMMITTEE MEETING MINUTES

October 19, 2022 10:00 a.m.

In attendance: Commissioner Haskell, Commissioner Hardesty (chair), Commissioner Devereaux, Commissioner Hartley, Mr. Hoyles, and Mr. Adkison,

Sharon Wyskiel – Office of General Counsel; Brian Burket, Jill Enz – Parks Department; Capt. Jim Suber – Waterways Coordinator

Meeting Convened: 10:08 am

Mr. Hardesty went over the history of the Mill Cove area and then talked about the history of this subcommittee. Mr. Hardesty showed photos which went over the timeline of the shoaling issues and how it has grown exponentially over time. Captain Suber gave an overview on the current safety markers. He detailed the temporary FWC markers and detailed the challenges of keeping them in place. Brian Burket, Parks Department, went over the quotes for markers cost. Mr. Burket said that markers could be approved through FIND and then he went over the timeline of the FIND process which would be over a 2 year period. Mr. Burket said there is \$90,000 in not spent FIND funds.

Ms. Haskell asked if we could hire our own firm to look at the shoaling instead of the Army Corps of Engineers. Mr. Burket stressed that you would need the Army Corps to confirm that they would accept those findings if they weren't the ones doing the study. Mr. Adkison said that pylons would cost less than \$10,000. Mr. Devereaux talked about visiting the site of the shoaling and simple ways he could show the cause of the exponential growth in the area. Mr. Devereaux and Mr. Hartley suggested a lawsuit. Lindsey Brock suing the Army Corps would be very complicated. Captain Suber explained the permitting process. Mr. Hoyles talked about studies that could be done to determine the source of the shoaling. The subcommittee focused on the need for safety concerns to be addressed as soon as possible.
