## INTRODUCTION

Pursuant to the requirements of Chapter 163, Part II, Florida Statutes (F.S.) and Chapter 9J-5, Florida Administrative Code (FAC), the City of Jacksonville adopted the 2010 Comprehensive Plan, which included the Capital Improvements Element, on September 1990. Section 163.3191, F.S. requires that the plan be updated periodically. Prior to the update of the plan, the local governments are required to prepare an Evaluation and Appraisal Report (EAR) on the adopted plan. The City of Jacksonville's first EAR was submitted to the Florida Department of Community Affairs (DCA) for review on September 1, 1997 and determined to be sufficient on October 31, 1997. The City of Jacksonville's second EAR was submitted to the DCA on October 1, 2008.

The first EAR for the 2010 Comprehensive Plan comprises the 1990-1995 period and the second EAR comprises the 2000-2007 period. The second EAR identifies major issues of concern to Jacksonville residents, reviews implementation of the plan since the last EAR, assesses achievements, successes and shortcomings of the Plan, identifies necessary changes and provides updated population projections.

The update of the Capital Improvement Element, presented in the following pages, reflects changes recommended in the second EAR. New policies have been added as recommended in the EAR and mandated by updates to the Florida Statutes and Florida Administrative Code, including extending the planning time frame to 2030 and renaming the plan the 2030 Comprehensive Plan. Issue statements have been removed in an effort to streamline the element and to remove text not belonging in the Goals, Objectives and Policies Section of this document. Various editorial, organizational and other appropriate agency or reference name changes have been made as well.

In addition to the aforementioned revisions, the Background Report of this document has also been updated to support the amended Goals, Objectives and Policies.

## **2030 2045COMPREHENSIVE PLAN**

---

# **CAPITAL IMPROVEMENTS ELEMENT**

**A**

## **GOALS, OBJECTIVES AND POLICIES**

---

**JACKSONVILLE PLANNING AND DEVELOPMENT DEPARTMENT  
GOALS, OBJECTIVES, AND POLICIES**

*City of Jacksonville 2045 2030-Comprehensive Plan  
Capital Improvements Element  
Revised April 2019*

## **GOAL 1**

The City shall undertake actions to provide and maintain, in a timely and efficient manner, necessary and adequate public facilities to all residents within its jurisdiction and to promote compact urban growth in areas identified through the 2030 Comprehensive Plan as having existing capacity.

**Objective 1.1** The City shall provide capital improvements to correct existing public facilities determined to be deficient, to accommodate desired future growth, and replace those facilities determined to be irreparable in a capital improvements schedule within the element. **Replacing an entire facility with a new structure requires City Council authorization.**

### **Policies 1.1.1**

The City shall maintain and annually inventory ~~those~~ public facilities required by Chapter 9J-5, F.A.C., within its jurisdiction and identify those facilities that are operating deficiently or have become obsolete. This inventory includes facilities related to roads, sanitary sewer, solid waste, drainage, potable water, parks and recreation, mass transit, and public schools.

### **1.1.2**

The City shall review and evaluate its Capital Improvement Program ordinance periodically to ensure close coordination between the Capital Improvement Program process and the City's Annual Budgeting process. This coordination will include such things as timing, budget estimates, and defining a capital improvement project.

### **1.1.3**

In order to ensure appropriate guidelines and parameters for future recurring capital maintenance budgets, the City shall annually update the suggested minimums and targets chart for recurring capital maintenance needs as a component of the annual Capital Improvement Program and in accordance with Chapter 106, City of Jacksonville Municipal Code.

### **1.1.3 1.1.4**

The City shall maintain and annually update a listing of any publicly funded necessary capital improvements projects, including a level of priority for funding ranked in order of priority. This capital facilities list will be based on evaluative criteria and will be adopted as a component of the City's Five-Year Capital Improvements Schedule. The following criteria will be utilized to prioritize the City's schedule of capital improvements:

- a. Enhancement, expansion, or new construction which eliminates existing public health hazards or existing capacity deficits and does not exacerbate existing nor create new deficiencies;
- b. ~~Public facility projects to ensure adopted level-of-service standards are achieved and maintained Repair, enhancement, or replacement of deficient or irreparable public facilities to achieve compliance with adopted Level of Service standards;~~
- c. ~~Financial feasibility, including impact on the City's capital and operating budgets;~~
- d. New construction or redevelopment consistent with the City's Future Land Use Element and projected growth patterns, provided that the facilities meet adopted Level of Service (LOS) standards for all other required elements and do not conflict with plans of State agencies and the St. Johns River Water Management District or their regional agency functional plans, and the JEA or their functional plans;
- e. New construction or redevelopment consistent with the City's Future Land Use Element and projected growth patterns which may initially exceed current Level of Service standards, but are phased concurrent with the created impacts of construction;
- f. Once established, Level of Service standards for any area will not be diminished due to the loss of population in that area.

#### **1.1.5**

The City shall implement a Concurrency Management System that addresses schools, potable water, sanitary sewer, solid waste, drainage, and parks and recreation. The City has replaced the transportation concurrency system with a Mobility System that addresses roadways, mass transit, and active transportation facilities.

#### **1.1.6**

The City shall, through joint participation agreements among federal, State, and local governments, and the private sector, as appropriate, identify and build needed public facilities, and allocate the costs of such facilities in proportion to the benefits accruing to each.

#### **1.1.4—1.1.7**

The City shall use the following LOS standards in reviewing the impacts of new developments upon the enactment of its Concurrency Management System in accordance with Chapter 163 (Part II), F.S., excluding the sections regarding transportation.

## PUBLIC FACILITY LEVEL OF SERVICE STANDARDS

### **DRAINAGE**

The City shall establish and continue to utilize the three level of Service (LOS) standards for drainage facilities. These Levels of Service shall define the depth of flooding allowed within and adjacent to the street rights-of-way as stated below and shall based on a 5-year design storm.

- LOS A -For new systems: Hydraulic gradeline at or below inlet grate: lowest roadway grade elevation at or above the 25-year design high-water elevation for the stormwater management facility.
- LOS B -For retrofitting an existing system: Flooding of streets and some yard areas but contained within the right-of-way.
- LOS C -For existing system: Flooding up to the finished floor elevation of structures.

#### Where:

Service Level A is the most advanced level of stormwater protection available and comprises the complete removal of stormwater from street surfaces during the design rainfall event. All stormwater is captured by the collection system and overland flow and street storage conditions are eliminated. Significant ponding does not occur and confined areas are drained without surcharge. This level of service obviates the health and safety concerns associated with minor flooding, eliminates transportation hazards and prevents vehicular flooding. The hydraulic grade line is generally at or below the inlet throat.

Service Level B is the next level of protection and comprises the prevention of significant levels of yard flooding but includes some flooding of street and yard areas. The sources of Level B flooding are overland flow of off-site stormwaters, surcharging of the stormwater collection system, or the ponding of confined waters. The impacts on residents in Level B service areas are primarily nuisance flooding problems related to temporary impassability of streets. The flooding of major roadways is limited to the outer lane areas but which does not prevent travel. There may be flooding of a limited duration along minor streets and flooding of yards is generally limited to 50% of the grassed area between street and structure. There is no flooding of structures. The hydraulic grade line is at or slightly above the inlet throat.

Service Level C is the minimum level of stormwater protection provided and comprises the prevention of flooding in structures or appurtenant

components of residential, commercial or institutional structures. Sources of flooding in Level C situations are via overland flow, surcharging of the stormwater collection system, or ponding of confined waters. Flooding of major roadways precludes the use of outer traffic lanes while travel in inner lanes is possible but difficult. Flooding of minor streets precludes travel and flooding of front yards up to the front face of the structure, but no structure flooding is indicated based on a five year storm frequency. The hydraulic grade line is significantly above the inlet throat.

## **SANITARY SEWER**

1. Effluent discharged from wastewater treatment plants shall meet all federal, state, and local standards.
2. Proposed wastewater collection, transmission, treatment and disposal facilities shall be designed and constructed to maintain the capacity associated with the following wastewater generation rates:

Residential - 100 gallons per capita per day (gpcd) [includes an infiltration/inflow factor of 25 gpcd] In accordance with 64E-6.008 F.A.C., or as addressed in the JEA Water, Wastewater and Reclaimed Water Design Guidelines.

Non-Residential - flows to be evaluated on a site specific basis using Section 64E-6-008 F.A.C., or as addressed in the JEA Water, Wastewater and Reclaimed Water Design Guidelines. 10D-6, 48(1) F.A.C.

Peak Flows will be determined in accordance with "Recommended Standards for Sewage Works", latest edition (Ten State Standards) and the Water Environment Federation Manual of Practice #9.

## **SOLID WASTE**

The Level of Service for solid waste disposal facilities shall accommodate a solid waste generation rate of 6.7 lbs. per capita per day.

## **POTABLE WATER**

To assure that an adequate Level of Service is provided by water facilities within the Water Service Area, the following standards shall be met:

1. Existing and proposed water facilities shall be designed and constructed in such a manner as to maintain the capacity associated with reasonably expected water demand consistent with all federal, State, and local standards. The capacity shall be based on the following minimum water consumption rates:

*City of Jacksonville 2045-2030 Comprehensive Plan  
Capital Improvements Element  
Revised April 2019*

Single Family Residential:

- Where reclaim water is not available – 250 gpd/EDU (EDU – Equivalent dwelling unit); or
- Where reclaim water is available – 200 gpd/EDU

Multi Family Residential:

- State of Florida Department of Health (FDOH) Chapter 64E-6 FAC Standards for Onsite Sewage Treatment and Disposal Systems, Part 64E-6.008 (1); or
- Fixture Counts; or
- 80 gpd/bedroom

Commercial and Industrial:

- State of Florida Department of Health (FDOH) Chapter 64E-6 FAC Standards for Onsite Sewage Treatment and Disposal Systems, Part 64E-6.008 (1)

Or as addressed in the JEA Water, Wastewater and Reclaimed Water Design Guidelines.

~~The Levels of Service for potable water facilities within the City shall be as follows:~~

1. ~~Existing and proposed water facilities shall be designed and constructed in such a manner as to maintain the capacity associated with the following water consumption rates:~~

~~Residential: 100 gallons per capita per day (gpcd)~~

~~Non-Residential: As it applies to non-residential land uses, demand for potable water will be evaluated on a site specific basis, in accordance with Table PW-1~~

**TABLE PW-1: COMMERCIAL WATER DEMAND IN THE UNITED STATES**

| <b>TYPES OF ESTABLISHMENTS</b>             | <b>GPD</b> |
|--|------------|
| Airports (per passenger)                   | 3-5        |

|--|------------|
| Camps:   |            |
| Construction, semipermanent (per worker)                     | -50        |
| Day with no meals served (per camper)                        | -15        |
| Luxury (per camper)  | 100-150    |
| Resorts, day and night, with limited plumbing (per camper)   | -50        |
| Tourist with central bath and toilet facilities (per person) | -35        |
| Cottages with seasonal occupancy (per resident)              | -50        |
| Courts, tourist with individual bath units (per person)      | -50        |
| Clubs:   |            |
| Country (per resident member)                                | 100        |
| Country (per non-resident member present)                    | -25        |
| Dwellings:   |            |
| Boarding houses (per boarder)                                | -50        |
| Additional kitchen requirements for non-resident boarders    | -10        |
| Luxury (per person)  | 100-150    |
| Multiple family apartments (per resident)                    | -40        |
| Rooming houses (per resident)                                | -60        |
| Single family (per resident)                                 | 50-75      |

| <b>TYPES OF ESTABLISHMENTS</b>   | <b>GPD</b> |
|--|------------|
| <u>Estates (per resident)</u>  | 100-150    |
| <u>Factories (gal. per person per shift)</u>                           | 15-35      |
| <u>Hotels with private baths (two persons per room)</u>                | 60         |
| <u>Hotels without private baths (per person)</u>                       | 50         |
| <u>Institutions other than hospitals (per person)</u>                  | 75-125     |
| <u>Hospitals (per bed)</u>   | 250-400    |
| <u>Laundries, self service (gal. per washing, per customer)</u>        | 50         |
| <u>Motels with bath, toilet and kitchen facilities (per bed space)</u> | 50         |
| <u>Motels with bed and toilet (per bed space)</u>                      | 40         |
| <b>Parks:</b>  |            |
| <u>Overnight with flush toilets (per camper)</u>                       | 25         |
| <u>Trailers with individual bath units (per camper)</u>                | 50         |
| <b>Picnic Areas:</b>   |            |
| <u>With bath houses, showers, and flush toilets (per picnicker)</u>    | 20         |
| <u>With toilet facilities only (gal. per picnicker)</u>                | 10         |
| <u>Restaurants with toilet facilities (per patron)</u>                 | 7-10       |
| <u>Without toilet facilities (per patron)</u>                          | 21-23      |
| <u>With bar and cocktail lounge (additional quantity (per patron)</u>  | -2         |

| <b>TYPES OF ESTABLISHMENTS</b>                               | <b>GPD</b> |
|--|------------|
| Schools:   |            |
| Boarding (per pupil)   | 75-100     |
| Day with cafeteria, gymnasium and showers (per pupil)        | 25         |
| Day with cafeteria, but no gymnasiums or showers (per pupil) | 20         |
| Day without cafeteria, gymnasiums or showers (per pupil)     | 15         |
| Service stations (per vehicle)                               | 10         |
| Stores (per toilet room)                                     | 400        |
| Swimming pools (per swimmer)                                 | 10         |
| Theatres:  |            |
| Drive-in (per car space)                                     | 5          |
| Movie (per auditorium seat)                                  | 5          |
| Workers:   |            |
| Construction (per person per shift)                          | 50         |
| Day (school or offices per person per shift)                 | 15         |

In cases where ranges are shown, the lower number shall be used for testing purposes.

2. The water supply system within the City shall operate with a rated capacity, which is no less than 5 percent above the historical maximum daily flow.

3. Minimum Pressure--All systems and grids:

| <u>CONDITION</u>  | <u>PRESSURE</u> |
|-------------------|-----------------|
| Minimum           | 20 psi          |
| Normal Operations | 40 to 80 psi    |

4. Storage Volume

- a. System-wide storage capacity for the regional system for finished water shall equal no less than 17 percent of system-wide average daily demand.
- b. Nongrid systems without ground or elevated storage reservoirs shall provide for ten (10) minute retention time within the hydropneumatic tank along with adequate and redundant well capacity to meet the fire peak demand condition of the system.

5. Fire Flow

Unless otherwise stipulated by the City Public Safety Department, minimum fire flows based on land use shall be maintained as follows, or as determined by the National Fire Protection Association (NFPA):

| <u>LAND USE</u>   | <u>GALLONS PER MINUTE (GPM)</u>              |
|---|--|
| Single Family.....  | 1,000 (500 gpm if automatic sprinklers used) |
| <del>2-family homes and Mobile Manufactured Homes</del> ..... | 750  |
| Multi-family Residential, and Commercial.....                 | 1,500 (750 from 2 hydrants)                  |
| Institutional and Industrial.....                             | 2,000 (1,000 from 2 hydrants)                |

**RECREATION AND OPEN SPACE**

**The City shall provide a variety of recreational facilities in the recreation and park system in order to achieve and maintain adopted levels of service standards.**

The City shall maintain the following Level of Service (LOS) standards for the provision of parks in the City ~~as shown in the Capital Improvements Element of this comprehensive plan:~~

The City shall provide 1.93 acres per thousand population of "Active/Passive" parks by Planning District.

The City shall provide 2.50 acres per thousand population of "Regional" parks Citywide.

However, in no event shall existing park and open space acreage be reduced in accordance with Section 122.421(b) 122.408 of the Ordinance Code.

The City shall provide one week of open public swimming at all public aquatic facilities per each 70,000 population.

The City shall provide one athletic field per each 2,000 population.

The City shall provide one court per each 2,400 population.

The City shall provide one mile of trail per each 50,000 population.

~~On an on-going basis the Parks, Recreation and Community Services The Planning and Development Department shall collect and track the participation/use data collected by the Recreation Department Community Services Department in order to further define recreation facility guidelines based on demand.~~

## **SCHOOLS**

**The City shall ensure that the capacity of schools is sufficient to support residential development order approvals at the adopted level of service (LOS) standards**

The LOS standards shall be applied consistently by the City within Duval County and by DCPS district-wide to all schools of the same type.

The uniform LOS standards for all public schools including magnets and instructional facility types, shall be 105% of the permanent Florida Inventory of School House (FISH) capacity, plus portables, based on the utilization rate as established by the State Requirements for Educational Facilities (SREF).

- (a) The designated middle schools in CSA 5 shall be identified as backlogged facilities and an interim level of standard within CSA 5 shall be 115% until January 1, 2018, after which the uniform LOS standard shall apply.
- (b) The implementation of long term concurrency management shall be monitored to evaluate the effectiveness of the implemented improvements and strategies toward improving the level of service standards for middle schools in CSA 5 over the 10-year period.
- (c) The City shall adopt DCPS Long Range Capital Improvements Plan as the 10-year long-term schedule of improvements for the purpose of correcting existing deficiencies and setting priorities for addressing backlogged facilities within CSA 5. The long-term schedule includes capital improvements and revenues sufficient to

meet the anticipated demands for backlogged facilities within the 10-year period. The long-term schedule improves interim level of service standards for backlogged facilities and ensures uniform LOS, as established in policy above, is achieved by 2018. The long-term schedule will be updated by December 1<sup>st</sup> of each year, in conjunction with the annual update to the DCPS Five-Year Capital Facilities Plan and the City's Capital Improvements Element.

- (d) The City's strategy, in coordination with DCPS, for correcting existing deficiencies and addressing future needs includes:
- a. implementation of a financially feasible Five Year Capital Facilities Plan to ensure level of service standards are achieved and maintained;
  - b. implementation of interim level of service standards within designated concurrency service areas with identified backlogged facilities in conjunction with a long-term (10-year) schedule of improvements to correct deficiencies and improve level of service standards to the district-wide standards;
  - c. identification of adequate sites for funded and planned schools; and
  - d. the expansion of revenues for school construction

By December of each year, the City, shall consider for adoption the DCPS Five-Year Capital Facilities Plan to the extent that it relates to school capacity to ensure maintenance of a financially feasible capital improvements program and to ensure level of service standards will continue to be achieved and maintained at the end of the five-year schedule of capital improvements. If the City determines that the DCPS Five Year Capital Facilities Plan is not financially feasible, then the City shall notify the DCPS that the Five Year Capital Facilities Plan is not financially feasible, and request that DCPS modify the Five Year Capital Facilities Plan to make it financially feasible.

If there is a consensus to amend the LOS, it shall be accomplished by the execution of an amendment to this Interlocal Agreement by all Cities and DCPS and the adoption of amendments to each local government's Comprehensive Plan, following an advisory review by the ILA Team and the Joint Planning Committee. The amended LOS shall not be effective until all plan amendments are effective and the amended Interlocal Agreement is fully executed. No level of service shall be amended without showing that the LOS is financially feasible.

**Objective 1.2** The City shall coordinate with local and/or regional transportation agencies in order to budget for anticipated capital improvements and to explore opportunities regarding matching funds and alternative financing mechanisms.

**Policies 1.2.1**

The City shall include in the annual capital appropriations of its budget a list of anticipated capital improvements and expenditures for the appropriate fiscal year.

**1.2.2**

The City shall continue to explore the feasibility of alternative financing mechanisms to facilitate the availability of public facilities. This shall include a feasibility review of dedicating a portion of the ad valorem taxes specifically for capital improvements.

**1.2.3**

The Jacksonville Transportation Authority and the City shall ensure that Downtown and the adjacent residential neighborhoods are served with autonomous the Skyway or an alternative non-polluting transit services or alternate non-polluting transit services system will be extended to residential portions of the City as federal funds matched with State, local and private monies become available.

**1.2.4**

~~The JTA and the City shall provide for an efficient, non-polluting light rail system as an integrated transit mode outside of the CBD. Construction of this efficient, non-polluting transit system and park-and-ride facilities along the right-of-way shall be, contingent upon receipt of federal, State and local funds.~~

**1.2.5 1.2.4**

The City shall develop a master long-range multi-modal transportation plan to encompass all multi-modal transportation needs within the City regardless of funding source.

**Objective 1.3** The City shall coordinate its land use decisions and manage its fiscal resources in a manner that maintains adopted Level of Service standards, ensures that existing and future facility needs will be met, and does not conflict with adjacent local governments' comprehensive plans or with State or regional agency functional plans.

**Policies 1.3.1**

The City shall integrate its land use planning and decision making-process with its five-year Schedule of Capital Improvements as adopted within this Capital Improvements Element. The City's annual five-year Capital Improvement Program (CIP) shall be prepared in conjunction with the annual review and

update of the Capital Improvements Element. ~~The Planning and Development Department shall closely monitor capital project construction startup and progress to eliminate the lag between infrastructure, land use changes and new development.~~

### **1.3.2**

Public facilities needed to support development shall be required to be provided concurrent with the impacts of such development. The City will continue to allow the use of development agreements between the City and developers.

### **1.3.3**

Decisions regarding the issuance of development orders and permits shall be based upon coordination of the development requirements set forth in the 2030 Comprehensive Plan, including, but not limited to, the Land Development Regulations and the availability of public facilities needed to support development concurrent with the impact of that development in a manner consistent with the requirements of the Florida Statutes or Florida Administrative Code, excluding references to transportation or roadway level of service and concurrency.

**Objective 1.4 The City shall limit public expenditures in Coastal High Hazard Areas, as defined in the Conservation/Coastal Management Element, to those improvements which restore or enhance natural resources or which maintain existing public facilities and services at their existing levels, except for public recreational facilities, which may be expanded and improved.**

#### **Policies 1.4.1**

The City shall include in its review process for infrastructure planning an assessment of appropriateness based upon the identified Coastal High Hazard Areas (CHHA).

#### **1.4.2**

The City shall limit the expenditure of public funds in Coastal High Hazard Areas to the restoration or enhancement of natural resources and to the replacement and renewal of existing public facilities, except for public recreational facilities, which may be expanded and improved.

#### **1.4.3**

The City shall limit the expenditure of public funds to maintain existing public facilities and services at their existing levels in the CHHA, except for public recreational facilities, which may be expanded and improved.

#### **1.4.4**

The City shall continue to promote financial support for research and planning to ensure water quality health for the St. Johns River and its tributaries, as well as to meet the City's water supply needs.

**Objective 1.5** The City shall manage its fiscal resources and its development review process to ensure the provision of needed capital improvements identified in the other plan elements, for previously issued development orders, and future development and redevelopment.

**Policies 1.5.1**

Prior to the issuance of a Certificate of Occupancy, the City through the implementation and enforcement of its Concurrency and Mobility Management System Office (CMMSO), shall ensure that all public facilities, including adequate water supplies but excluding transportation, needed to serve development for which development orders were previously issued are provided concurrent with the impacts of said development. Additionally, prior to approval of a building permit or its functional equivalent, the City shall consult with the applicable water supplier to determine whether adequate water supplies to serve the new development will be available no later than the anticipated date of issuance of a certificate of occupancy or its functional equivalent.

**1.5.2**

Direct Net Debt shall not exceed 5% of assessed valuation.

**1.5.3**

Annual General Fund debt service requirements of tax supported debt shall not exceed 20% of General Fund operating revenues.

**1.5.4**

Fiscal policies to direct expenditures for capital improvements shall recognize the policies of the other elements of the 2030 Comprehensive Plan.

**1.5.5**

The City shall continue to adopt a five-year capital improvement program and annual capital budget as a part of its budgeting process.

**1.5.6**

The City shall prioritize public expenditures on infrastructure to achieve public policy goals.

**IMPLEMENTATION, MONITORING AND EVALUATION**

**Five-Year Capital Improvements Schedule**

Monitoring and evaluation of this element are necessary to ensure effectiveness. Chapter 163 (Part II), F.S., requires that this element be reviewed annually to ensure that facilities are available concurrent with the impacts of development and that the levels of service are maintained. This is achieved through the annual update to the Capital Improvement Schedule of projects.

*City of Jacksonville 2045 2030 Comprehensive Plan  
Capital Improvements Element  
Revised April 2019*

Attachment A is the Capital Improvement Element Schedule of projects which the City has identified throughout the various elements as needed to support its adopted Levels of Service for the next five years. The Capital Improvements Schedule is the implementation mechanism for the Capital Improvements Element. This schedule stages the timing, location, projected costs, and revenue sources for funding the projects in the Capital Improvements Program (CIP) which will be adopted by ordinance. As the CIE is updated each year, the additional City projects will also be included in the CIP. The data for this schedule are based upon the City's capital priorities and needs for the ensuing five-year period, by first addressing legal requirements and life safety hazards, and thereafter taking into consideration the City's goals and policies including those set forth in the Comprehensive Plan and the debt affordability targets established by the City, urgency of a project, the City's ability to administer a project, the involvement of outside agencies, and the potential for future project funding. the inventory and assessments of facilities forms which comprise Attachment A of the support documents. These forms indicate the priority establishment for each project based upon (1) the correction of a health hazard, (2) the correction of a deficiency, (3) the replacement of an existing facility, (4) and/or projected need to accommodate growth.

The expenditures and funding sources from FY 2006/07 through FY 2011/12 are shown by year. For the planning period beyond to 2012, only lump sum expenditures are identified. All projects listed for the planning period beyond 2012 are collectively identified as the City of Jacksonville Capital Improvement Program. The projects were taken from their respective elements of the 2030 Comprehensive Plan, which ensures consistency among the elements.

### **Monitoring and Evaluation**

Monitoring and evaluation of this element are necessary to ensure effectiveness. Chapter 163 (Part II), F.S., requires that this element be reviewed annually to ensure that facilities are available concurrent with the impacts of development and that the levels of service are maintained.

The annual review will be the responsibility of the Planning and Development Department. The review and subsequent analysis will culminate in recommendation to be presented to the City Council for action. Applicable planning staff should provide input to the Finance Department during the budget formulation process. The annual review process will include:

- a) an evaluation of costs, revenues, and scheduling;
- b) an evaluation of the continued consistency with the infrastructure sub-elements and in particular, support of the Future Land Use Element;

- c) the establishment of priorities and ranking of projects;
- d) the correction of deficiencies;
- e) a determination as to whether the Levels of Service and Mobility Scores are measurable and the effectiveness in maintaining them;
- f) the inclusion of the next years' capital facilities needs into the five-year schedule; and
- g) concurrency status.

### **Concurrency Management System**

The City has adopted a Concurrency Management System as part of its Land Development Regulations. The Concurrency Management System ensures, prior to the issuance of a development order and development permit, that the adopted Level of Service standards for schools, potable water, sanitary sewer, solid waste, drainage, and parks and recreation will be maintained and that public facilities and services needed to support development are available concurrent with the impacts of development.

The City shall require concurrency tests for local development orders and local development permits to be conducted by each agency or department having responsibility for the impacted facility(s) prior to the consideration of such local development orders or local development permits, which shall include data concerning proposed densities and intensities, according to the following guidelines:

1. Each affected agency or department shall develop customized concurrency testing procedures and mechanisms that assess the capacity demands of a proposed development upon its particular facility(s);
2. Each affected agency or department shall communicate the results of its customized concurrency test via the computer software program developed by the City's Central Services Computer Systems Division.

The computer software program developed by the Information Technologies Department shall be called the Automated Concurrency Management System Data Base. The Automated Concurrency Management System Data Base and each affected agency or department shall monitor changes in the capacities of affected public facilities over time and changes in the Levels of Service provided for affected public facilities over time.

All local development orders and local development permits approved by the City

*City of Jacksonville 2045-2030 Comprehensive Plan  
Capital Improvements Element  
Revised April 2019*

shall be accompanied by an approved Concurrency Management Reservation Certificate (CRC) for that specific project, certifying that it has passed mandated concurrency tests.

Capacity for all local development orders and local development permits holding approved Concurrency Reservation Certificates shall be reserved in the affected public facilities for the life of its associated and approved local development order or local development permit.

### **Mobility Fee System**

The City shall implement a Mobility System, as described in the objectives and policies that follow. The Mobility System projects help mitigate the effects of increased demand due to growth, with Quality/Level of Service (Q/LOS) improving in the "Build" scenario (Mobility System projects included) relative to the "No Build" scenario (Mobility System projects not included). The volume-to-capacity (V/C) analysis, in conjunction with each update of the Mobility System, shall verify that the mobility fee expenditures and projects do not create excess capacity and improve conditions beyond what is necessary to mitigate the effects of growth.

**Objective 1.6 The City's process for assessing, receiving and applying a landowner's mobility fee for a proposed development shall be governed by the following policies:**

#### **Policies 1.6.1**

The City shall use a quantitative formula for purposes of assessing a landowner or developer's mobility fee for transportation impacts generated by a proposed development. The landowner or developer's mobility fee shall be calculated based on a formula adopted in the Ordinance Code.

#### **1.6.2**

The City shall use the most recent edition of the Institute of Transportation Engineer's (ITE) publication entitled *Trip Generation* to calculate the value of daily trips. The City may collect the necessary data to create its own trip generation rates if the ITE manual is not reflective of local conditions.

#### **1.6.3**

Mobility fee dollars shall be applied to established funding accounts for each applicable Mobility Zone and dedicated to Mobility System Projects as shown in the Schedule of Projects within this Element or consistent with Transportation Element Policy 1.4.12.

#### **1.6.4**

Mobility fee dollars shall have a reasonable relationship to the transportation impacts generated by a landowner's or developer's proposed development.

Mobility fee dollars shall be applied to the selected transportation improvement project when funds collected are available to the investment necessary to begin the project and the project is located within the respective Mobility Zone.

#### **1.6.5**

Developments which have already been approved via a fair share agreement for concurrency can move forward under the conditions of such agreements; however, these agreements shall not be extended by the City Council. Concurrency approvals for Conditional Capacity Availability Statements (CCAS), Concurrency Reservation Certificates (CRCs), Vested Property Affirmation Certificates (VPACs), Development Agreements, Redevelopment Agreements, and Fair Share Agreements that have not expired shall be recognized and accepted until expiration, unless the applicant chooses to pursue the Mobility System.

#### **1.6.6**

Development within the Transportation Management Area (TMA) shall be governed by the local development agreements approved on April 8, 1999, until the local development agreements are terminated or abandoned.

#### **1.6.7**

As set forth in the Ordinance Code, a landowner or developer may construct, cause to be constructed, or provide the real property needed for a transportation improvement project and receive credit for that project. Any improvement or land associated with an improvement that is required for a development's minimum transportation and traffic operation or circulation, including for bicycle and pedestrian movement, applicable to a development order, pursuant to federal, state or local laws or regulations, including but not limited to the Land Development Procedures Manual, shall not be considered as eligible or qualified for credit pursuant to Section 655 of the Ordinance Code.

#### **1.6.8**

Notwithstanding the provisions set forth in Policies 1.6.1 through 1.6.8, the City, through the enactment of an ordinance, may establish finite periods of time in which the payment of the mobility fee will be waived for all development within the City in order to encourage economic growth.

#### **1.6.9**

In the event of adoption of an ordinance establishing a temporary waiver as provided in Policy 1.6.8, any transportation improvement project which meets the following criteria shall be deemed to be the prioritized project in the 5-year CIE schedule to be funded by mobility fee dollars collected within the respective Mobility Zone after the expiration of the waiver: (1) the project is required to be constructed by a party to a fair share contract in effect as of the adoption of the waiver ordinance; (2) the project is to be funded by fair share assessments paid by development located within the Mobility Zone; (3) construction of the project

has commenced prior to the adoption of the waiver ordinance; and, (4) fair share assessments have been received by the City and applied to the project prior to the adoption of the waiver ordinance. Mobility fee dollars shall be applied to any such transportation improvement project through the Fair Share Specific Projects Special Revenue Fund established by the City for the project until the project is fully funded in accordance with funding and cost calculation methodologies in the applicable fair share contract.

| 5 <sup>th</sup> Street Bridge Replacement            | This is an 80' long two lane concrete bridge located on 5 <sup>th</sup> Street between Ellis Road and Edgewood Avenue North. The most recent FDOT evaluation noted that the bridge is structurally deficient and is load rated and needs to be replaced. The timber piles upon which the bridge deck is resting are in seriously degraded condition.  | CIP 2021-505-E       | \$750,000                            | \$3,100,000 |             |             |          |   |            | Transportation 2.1                       |
| Acre Road Bridge Replacement                         | Replacement of three timber bridges on Acree Road near the Duval County line.   | CIP 2021-505-E       |                                      | \$1,000,000 |             |             |          | \$11,000,000  |            | Transportation 2.1                       |
| Alta Drive Bridge                                    | Design for replacement of a bridge on Alta Drive between River Enclave Lane and Terrian Creek Lane.   | CIP 2021-505-E       |                                      | \$700,000   |             |             |          | \$3,800,000   |            | Transportation 2.1                       |
| Bay Street - ITS Bay St. fr 1-95 Festive Park Drive  | This FDOT is developing plans for the installation of flood sensors, closed circuit television cameras, fiber optic cable, and associated components along Bay Street between I-95 and Festive Park Drive. The purpose of this project is to provide greater stormwater resiliency, cameras for transportation operations and public safety, and fiber optic communications for future expansion to be identified in the Bayax (Bay Street Innovation Corridor) project. The FDOT has agreed to provide funding for the City's participation in the design, management and construction of the project. | CIP Amend 2021-595-E | \$610,000                            |             |             |             |          |   |            | Transportation 2.1                       |
| Cedar Point Rd Bridges Widening                      | Construction of bridge widenings with sidewalks for two bridges on Cedar Point Road between Boney Road and Grover Road.   | CIP 2021-505-E       |                                      | \$500,000   |             |             |          |   |            | Transportation 2.1                       |
| Countywide Intersection Imp & Bridge Rehab – Bridges | This is a continuous requirement necessary to maintain the City's 186 bridge structures. It will be used for general maintenance repairs, design to correct scour and functional obsolescence, and construction of specific bridge projects.  | CIP 2021-505-E       |                                      | \$450,000   | \$1,600,000 | \$1,900,000 |          | \$500,000   |            | Transportation 2.1                       |
| Countywide Bulkhead- Assess, Repair and Replacement  | This funds inspection/repair/replacement of the City's countywide bulkhead assets not limited to the St. Johns River. Funding will be used to evaluate and address failing bulkheads. Citywide bulkhead replacement (failures and poor countywide bulkheads).   | CIP 2021-505-E       |                                      | \$500,000   | \$500,000   | \$500,000   |          | \$500,000   |            | Conservation/<br>Coastal<br>Management 6 |

| Tar Kiln Bridge                                  | Design and construction of guardrail upgrades and maintenance items.   | CIP 2021-505-E       |                                |             |          | \$500,000   |          |             |            | Transportation 2.1                                     |
| Wells Road Bridge                                | Design and construction of replacement of a 54 year old timber bridge serving a dead end community on Wells Road.  | CIP 2021-505-E       |                                |             |          |             |          | \$2,500,000 |            | Transportation 2.1                                     |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

**Roads, Infrastructure, Transportation**

| Project Name   | Description  | Source                                 | FY 20-21 Amendments to the CIP | FY 21-22    | FY 22-23    | FY 23-24    | FY 24-25    | FY 25-26    | Beyond 5th   | Element, Goal, Objective showing Comp Plan Consistency |
|--|--|--|--------------------------------|-------------|-------------|-------------|-------------|-------------|--------------|--|
| Northbank Bulkhead   | Our continuous inspection of the Northbank Riverwalk (previous in 2006 and recently in 2010) indicates a need to begin phasing the entire replacement of the bulkhead. There is approximately 1,400 linear feet of bulkhead (including 1,400 linear feet at Met Park) and it is estimated that the complete replacement cost will be over \$31 million. Our plan is to phase the replacement over time. The FY18/19 funding will be for the approx. 645 ft of bulkhead adjacent to the Times Union Center for Performing Arts.   | CIP 2021-505-E                         | \$8,000,000                    | \$8,000,000 | \$8,000,000 | \$8,000,000 | \$4,000,000 | \$4,000,000 | \$15,900,000 | Conservation/ Coastal Management 6                     |
| St. Johns River Bulkhead, Assess/Restore                       | This funds inspection/repair/replacement of the City's countywide bulkhead assets. Previous years' funding has been utilized to inventory and assess 557 structures throughout Jacksonville. They have been assessed as being either in excellent, good, poor, or failing conditions to allow for a prioritization of improvement. Previous years' allocations have also funded the repair/replacement of the highest priority structures (those identified as Failure & Poor condition – 86 Structures), and continual funding supports ongoing inspections in order to update the project prioritization list and address the next group of highest priority structures. | CIP 2021-505-E                         | \$1,500,000                    | \$1,500,000 | \$1,500,000 | \$1,500,000 | \$1,500,000 | \$1,500,000 | \$1,500,000  | Conservation/ Coastal Management 6                     |
| Willowbranch Bulkhead Replacement                              | This project will design and construct a replacement bulkhead for The Willowbranch Creek system between Riverside Avenue and Sydney St. The design will address bulkhead demolition, replacing the bulkhead, removal of sediment build up, and eliminating eroding areas due to bulkhead failure.  | CIP 2021-505-E                         | \$500,000                      | \$500,000   | \$3,500,000 | \$3,300,000 |             |             |              | Conservation/ Coastal Management 6                     |
| Apache Ave Curb and Gutter Belvedere Ave Drainage Improvements | Conversion of urban roadway section to a curb & gutter City Standard Section using the Curb & Gutter Petition process.<br>Improvements to the collection system including replacement of a 36" culvert and a 30" trunkline with larger structures and adding inlets along Belvedere Avenue.  | CIP 2021-505-E<br>CIP 2021-505-E       |                                |             | \$75,000    | \$300,000   |             |             |              | Transportation 2.1                                     |
| Big Fishweir Creek - Ecosystem                                 | An aquatic ecosystem restoration project at Big Fishweir Creek consisting of removal of sediments, creation of a brackish marsh island, planting of vegetation, and wetland reconnection via "cut thru berm" construction.   | CIP 2021-505-E<br>CIP Amend 2021-884-E |                                |             | \$250,000   |             |             |             |              | Conservation/ Coastal Management 6                     |

| Lobrano Court Drainage Improvements                    | Project will repair damaged curb and gutter and driveways on Lobrano Court. The base material under the curb and gutter and asphalt is proposed to be recycled concrete aggregate. The modified base material will protect the curb and gutter and each driveway for a longer life expectancy.   | CIP 2021-505-E |                                |              |              |             | \$500,000                          |
| Major Outfall Ditch Restoration/ Cleaning              | The City of Laksonville has 20.9 miles of major outfall ditches. The outfall drain major drainage basins throughout the county. Proactive restoration is needed to ensure these outfalls can help to minimize flooding during major storm events.  | CIP 2021-505-E |                                | \$3,000,000  | \$3,000,000  | \$3,000,000 | \$2,500,000                        |
| Mallory Street Drainage Improvement                    | This project will construct City Standard Curb Inlets at the low spot on both sides of Mallory Street to drain the standing storm water, install approximately 255 lf of 15" RC pipe, and connect to the existing system outlets of the St. Johns River. Project will include driveway repair and possible conflict sanitary manholes. | CIP 2021-505-E |                                |              | \$320,000    |             | Drainage 1.4                       |
| Marquette / Woodmere Area Drainage Improvements        | Design and construction of drainage improvements and channel dredging from Marquette Avenue to Woodmere Drive. to improve drainage and alleviate flooding issues on residential properties along Shirley Avenue.   | CIP 2021-505-E |                                |              |              |             | \$557,000                          |
| McCoy's Creek Outfall Improvements with Riverwalk      | Stormwater improvement from Myrtle to the outfall as well as opening up the mouth of McCoy's Creek to support access to the creek, and improved recreational opportunity associated with McCoy's Creek.  | CIP 2021-505-E |                                | \$22,000,000 | \$18,600,000 | \$7,000,000 | \$5,100,000                        |
| Myrtle Avenue Stormwater Pump Replacement              | Additional funding to rebuild the 50-year-old pump station. The station is currently under design.   | CIP 2021-505-E |                                |              | \$535,000    |             | Conservation/ Coastal Management 6 |
| Oceanway Community Center Septic Abandonment – Utility | This project identifies funds to abandon the existing septic system and connect to the public utilities.   | CIP 2021-505-E |                                |              |              |             | \$215,000                          |
|  |  |                |                                |              |              |             | Sanitary Sewer 1.1                 |

Ordinance 2022-120-E

| Old Kings Road (DSR) - Capital Improvement   | Drainage restoration project at 7517 old Kings Road   | CIP 2021-505-E       |                                | \$70,000     |              |              |              |
| Ray Greene Park Septic Abandonment – Utility | This project identifies funds to abandon the existing septic system and connect to the public utilities.  | CIP 2021-505-E       |                                |              |              |              |              |
| Resiliency Infrastructure Improvements       | It is important for public infrastructure to be adaptive to changing environmental conditions, it will be important to assess the ability of existing infrastructure to withstand current and future stresses, and to plan for the infrastructure's rehabilitation, relocation and/or replacement. In addition, Public access to resilient related information and data assist with community engagement. | CIP 2021-505-E       |                                | \$10,000,000 | \$10,000,000 | \$10,000,000 | \$10,000,000 |
| Seabreeze Drive Drainage Improvement         | Install three check valves in existing storm pipes to prevent high tide from the intracoastal back-flowing up the pipes and flooding the neighborhood.  | CIP 2021-505-E       |                                |              |              |              |              |
| Sedgemoore Drive Drainage Improvements       | Repair damaged residential roadway along Sedgemoore Drive and Halethorpe Drive.   | CIP 2021-505-E       |                                |              |              |              |              |
| Sheridan Street (DSR)- Capital Improvement   | Design and construction to address three drainage issues in the neighborhood. Project includes new drainage inlets and pipe systems, and grassed swales from Sheridan Street down Fleet Street.   | CIP 2021-505-E       |                                |              |              |              |              |
| Silver Street Drainage Improvements          | This project proposes to remove and replace the existing storm drainpipe and inlet system on Silver Street beginning near 7th Street and ends at the outlet at Hogan's Creek in Kinston Park.   | CIP 2021-505-E       |                                |              |              |              |              |
| Stormwater Pump Stations Generators          | This project is to purchase and install new permanent generators at the following locations: Hillman Drive, Myrtle Avenue, Hilly Road, Bradley Road, Jessie Street, McGirt's Creek Park, and Sandalwood Canal.  | CIP Amend 2021-505-E |                                |              |              |              |              |
|  |   | CIP Amend 2021-79-E  |                                |              |              |              |              |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

**Roads, Infrastructure, Transportation**

| Project Name                                    | Description  | Source         | FY 20-21 Amendments to the CIP | FY 21-22     | FY 22-23    | FY 23-24    | FY 24-25    | FY 25-26    | Beyond 5th  | Element, Goal, Objective Showing Comp Plan Consistency |
|---|--|----------------|--------------------------------|--------------|-------------|-------------|-------------|-------------|-------------|--|
| Sunbeam Road (DSR) - Capital Improvement        | Repair an established 65 foot City of Jacksonville drainage easement ditch and embankment inside the property of the Woodlake Apartments. Remove approximately 348 feet of the existing concrete and replace with new concrete ditch that is better suited to last longer under the current drainage patterns.   | CIP 2021-505-E | \$376,000                      |              |             |             |             |             |             | Drainage 1.4   |
| Sunbeam Road Underbeam Repair Project -Phase 2  | Replace the existing underdrain and any failing roadway elements for a segment of Sunbeam Rd that is roughly 600 LF.   | CIP 2021-505-E |                                |              |             |             |             | \$4,000,000 |             | Drainage 1.4   |
| Underdrain Replacements                         | Underdrain is a drainage system installed under a road to collect and transport subsurface groundwater. These buried conduits are usually wrapped in geotextile fabric which allow water to enter the underdrain while keeping sediments out. Underdrain is installed to keep the groundwater (protect) from coming in contact with the roadway subgrade and base. | CIP 2021-505-E | \$250,000                      | \$1,000,000  | \$1,000,000 | \$500,000   | \$500,000   | \$500,000   |             | Drainage 1.4   |
| Upstream Fishing Creek Drainage Improvements    | Design and construction of drainage improvements from the outfall of the Regional Pond at 3875 18th Street, across Nancy Drive and north to Ortega Farms Boulevard.  | CIP 2021-505-E |                                |              |             |             |             |             | \$2,818,000 | Drainage 1.4   |
| Venetia Drainage Improvements                   | Drainage improvement project to address flooding being experienced on Demedici Avenue, Davinci Avenue and Della Robbia Way. The stormwater collection system will be improved to current design standards. Initial funding will be for design and real estate acquisition.   | CIP 2021-505-E | \$500,000                      | \$900,000    |             |             |             |             |             | Drainage 1.4   |
| Water/Wastewater System Fund                    | The intent of this project is to improve surface water quality by removing septic tanks that are contributing pollutants to existing surface water bodies. It is a requirement of the Basin Management Action Plan (BMAP) for both the lower mainstream of St. Johns River and the many impaired tributaries of the St. Johns River.                               | CIP 2021-505-E | \$50,000,000                   | \$50,000,000 | \$5,000,000 | \$5,000,000 | \$5,000,000 | \$5,000,000 |             | Sanitary/Sewer 1.1                                     |
| West Side Boulevard (DSR) - Capital Improvement | Drainage restoration project at 2800 West Side Boulevard   | CIP 2021-505-E |                                | \$130,000    |             |             |             |             |             | Transportation 2.1 and Drainage 1.4                    |
| Wills Branch Dredge                             | This project will design, permitting and dredging of Wills Branch from Old Middleburg Road to location 2000 feet south of Lane Avenue.   | CIP 2021-505-E |                                | \$2,700,000  |             |             |             |             |             | Drainage 1.4   |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Woodside Street Underdrain Drainage Improvements | Project will construct underdrain and cleanouts along both sides of Woodside Street which will be connected to the existing City system on line street. Installs approx. 2200 LF of 6 inch underdrain pipe, repairs pavement and repairs sidewalk.   | CIP 2021-505-E |                                |          |          |          | \$625,000                             |
| Yacht Club Road Drainage Improvements            | Design and construction of improvements to the drainage collection system to remediate significant areas of standing water along Yacht Club Road. This may also include a Check Valve to prevent the river from back-flowing into the roadway and residential yards.   | CIP 2021-505-E |                                |          |          |          | Drainage 1.4                          |
| Zora Street (DSR) - Capital Improvement          | Drainage restoration project 6542 Zora Street  | CIP 2021-505-E |                                |          |          |          | Transportation 2.1 and Drainage 1.4   |
| Cemetery Entrance Improvements                   | Design, misc. contingency, and construction for various cemetery entrance improvements, including Moncrief Rd. entrance medians with trees and grass, fencing, historic street lights, and historic signs (including power for Pinehurst, Sunset, and Memorial cemeteries, and entrance ditch piping, fencing, historic street lights, and historic signs (including power) for Mt. Olive cemetery.                  | CIP 2021-505-E |                                |          |          |          | Capital Improvements 1.1              |
| Department of Health Generator Replacement       | This project is to purchase and install a new permanent generator at the Department of Health Building.  | CIP 2021-505-E |                                |          |          |          | Capital Improvements 1.1              |
| Mayport Dock Redevelopment                       | Design and construction of dock facilities on the St Johns River to support the vision of the Mayport Community. Dock facilities will support the commercial shrimping fleet, local charter fishing and recreational boating.  | CIP 2021-505-E |                                |          |          |          | Recreation and Open Space 4.1 and 4.2 |
| MOSH and Riverwalk at the Shipyards              | Initial effort will address design and engineering cost associated with permitting the site for a future Civic Attraction and Riverwalk improvements. Design/Engineer will include, but not limited to, environmental/geotechnical engineering, establishing site grade elevation, parking lot design, extension of A. Philip Randolph Blvd., design a pad ready foundation and designing site supporting utilities. | CIP 2021-505-E |                                |          |          |          | Capital Improvements 1.1              |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

|--|---|----------------|--------------------------------|--------------|--------------|--------------|--------------|--------------|------------|--|
| Pre Trial Detention Facility Generator Replacement       | This project is to purchase and install a new permanent generator at the Pre Trial Detention Facility.  | CIP 2021-505-E |                                | \$456,965    |              |              |              |              |            | Capital Improvements 1.1                               |
| Police Memorial Building Generator Replacement           | This project is to purchase and install a new permanent generator at the Police Memorial Building.  | CIP 2021-505-E |                                | \$273,616    |              |              |              |              |            | Capital Improvements 1.1                               |
| Riverfront Plaza   | This project will provide funding to study concept hardcap and greenscape, design and site prep work in conjunction with Downtown Investment Authority needed at 2 West Independent Drive for future development of two developable sites.  | CIP 2021-505-E |                                | \$1,000,000  |              |              |              | \$12,000,000 |            | Capital Improvements 1.1                               |
| Superior Street Fueling Station                          | Design and installation of 3 – 20,000 gallon above ground storage tanks piping, new dispensers and canopy   | CIP 2021-505-E |                                |              |              |              | \$325,000    | \$1,225,800  |            | Capital Improvements 1.1                               |
| Traffic Management Facility Generator Replacement        | There are critical Public Buildings facilities that need generator backup power to allow the facilities to function during and after a major storm event if power is lost.  | CIP 2021-505-E |                                | \$93,737     |              |              |              |              |            | Transportation 2.1                                     |
| 2 <sup>nd</sup> Avenue North Roadway Safety Improvements | Reconstructing 2nd Avenue North from 20th Street to the Boa Ramp. Improvements will result in a safer roadway section which includes constructing a City Standard roadway section, stormwater treatment facilities and new bridge.  | CIP 2021-505-E |                                | \$5,500,000  |              |              |              |              |            | Transportation 4.1                                     |
| Belfort Road Widening                                    | This project will widen Belfort Road from 2 lanes to 4 lanes with a center turn lane from Southpoint Parkway to Gate Parkway, modify or replace the traffic signal installations at the Southpoint Parkway and Gate Parkway, and install traffic safety improvements on Belfort Road from A.C. Skinner Parkway to Gate Parkway. | CIP 2021-505-E |                                |              | \$7,200,000  |              |              |              |            | Transportation 2.1                                     |
| Broward Road Improvements                                | Additional funding to complete repairs on Broward Rd. including reconstruction of pavement, concrete curb and gutter, concrete sidewalk, and drainage improvements on Broward Rd.   | CIP 2021-505-E |                                | \$1,400,000  |              |              |              |              |            | Transportation 2.1                                     |
| Cedar Road/ Sawpit Road (New Berlin to Shark)            | Widening, milling and resurfacing Sawpit Road from Cedar Point to Shark Road.   | CIP 2021-505-E |                                |              | \$1,000,000  | \$5,000,000  | \$11,500,000 |              |            | Transportation 2.1                                     |
| Chaffee Rd   | Design & Construction to widen Chaffee Road from 2 lanes to 4 lanes with medians and auxiliary turn lanes from Normandy Blvd to I-10.   | CIP 2021-505-E |                                | \$12,500,000 | \$17,700,000 | \$11,500,000 |              |              |            | Transportation 2.1                                     |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

**Roads, Infrastructure, Transportation**

| Project Name  | Description  | Source         | FY 20-21 Amendments to the CIP | FY 21-22  | FY 22-23  | FY 23-24    | FY 24-25    | FY 25-26    | Beyond 5th  | Element Goal, Objective Showing Comp Plan Consistency |
|---|--|----------------|--------------------------------|-----------|-----------|-------------|-------------|-------------|-------------|---|
| Children's Way / Nira St. Ped. Improvements                 | Design and construction of a biking and walking path on Children's Way/Nira St. Includes the construction of the path over the railroad tracks at Nira St. and closure of the at-grade railroad crossing on Naldo Ave.   | CIP 2021-505-E |                                | \$300,000 |           |             |             |             |             | Transportation 4.1                                    |
| Countywide Intersection Imp & Bridge Rehab-Intersections    | This allocation funds county-wide enhancements to City intersections. The enhancements are focused on City intersection safety and capacity improvements to mitigate hazardous conditions and enhance roadway traffic flow and operations throughout Jacksonville. The Public Works Department has developed a prioritization process to identify sites that require mitigation of safety issues and sites with persistent capacity issues.  | CIP 2021-505-E |                                | \$400,000 | \$300,000 | \$2,000,000 | \$2,000,000 | \$1,500,000 |             | Transportation 2.1                                    |
| College Street Bicycle Boulevard                            | This project will design, construct, and perform inspection services for the construction of a bicycle boulevard approximately 3,600 linear feet along College Street and Fairmouth Street from Cassat Avenue to Luna Road, in the Murray Hill neighborhood. The scope of the work will be determined based on the bicycle boulevard design guidelines and may include shared bicycle lane markings, "sharrow", traffic striping, signage for bicycles, and an upgrade of the crosswalk at Edgewood Avenue crossing. | CIP 2021-505-E |                                |           |           |             |             |             | \$87,654    | Transportation 4.1                                    |
| Commonwealth Ave/ Pickettville Rd. Intersection Improvement | Intersection improvement to include but not limited to land acquisition to support increasing the west bound right turn radius and traffic signal modification.  | CIP 2021-505-E |                                |           |           |             |             |             |             | Transportation 2.1                                    |
| CRISI Grant (CSX/FEC/FDOT/JTA) Grant Match                  | FDOT has been awarded the FRA's Consolidated Rail Infrastructure and Safety Improvements (CRISI) Grant, to mitigate Jacksonville's Freight Train-Vehicle/Pedestrian/Bicyclist Conflicts. COI agrees that it will furnish the Department a grant match to be used for the estimated project costs. The upgraded switches, new trackage, and technology improvements provide the opportunity to improve freight rail operations, while affording clear community benefits.   | CIP 2021-505-E |                                |           |           |             |             |             |             | Transportation 2.1                                    |
| Crosswalk Murals  | This project is to provide murals in crosswalks.   | CIP 2021-505-E |                                | \$200,000 | \$150,000 |             |             |             | \$1,000,000 | Recreation and Open Space 2.1                         |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Roads, Infrastructure, Transportation                            |   |                             |                                      |             |             |             |             | Element, Goal,<br>Objective showing<br>Comp Plan<br>Consistency |   |   |
|--|---|-----------------------------|--------------------------------------|-------------|-------------|-------------|-------------|---|---|---|

| Edgewood Avenue<br>Bicycle<br>Improvements                       | This project will construct new bicycle improvement segments of Edgewood Avenue as described in the Mobility Plan. Those improvements consist of FY18/19 - Plymouth St to the waterfront bike lane, pavement markings and signage; FY19/20 - I-10 to Cassat Ave protected bike lane; FY20/21 - Mayflower to I-10 buffered bike lane; FY21/22 - Mayflower Street to Plymouth Street protected bike lane; FY22/23 - New Kings Rd to McIendon Dr paved shoulder.   | CIP<br>2021-505-E           |                                      | \$213,538   | \$1,194,619 |             |             |   | Transportation 4.1  |   |
| Emerald Trail -<br>Hogan Street<br>Connector                     | The Hogan Street Connector provides a missing connection between the Hogan's Creek Greenway trail and the Northbank Riverwalk trail. The proposed trail begins on the northern end at Hogan's Creek and interacts with the Florida State College at Jacksonville (FSCJ) campus as a shared-use street.  | CIP<br>2021-505-E           |                                      | \$4,980,000 | \$780,000   |             |             |   | Recreation &<br>Open Space 1.3<br>and<br>Transportation 4.1 |   |
| Emerald Trail-<br>Hogan's Creek to<br>Riverwalk                  | East of Main Street, this segment will extend the Hogan's Creek Greenway along the creek corridor to the south of Duval Street where the segment will create a loop connection on the east side of downtown with the Northbank Riverwalk and the TIAA Bank Field, Veterans Memorial Arena, and Baseball Grounds of Jacksonville sports venues.  | CIP<br>2021-505-E           |                                      |             | \$2,000,000 | \$8,000,000 | \$8,000,000 | \$12,170,000  |   | Recreation &<br>Open Space 1.3<br>and<br>Transportation 4.1 |
| Emerald Trail - S<br>Line to Stonewall<br>Street<br>Improvements | The model project will make the connection from the intersection of the existing S-line trail to the intersection of Park Street and Stonewall Street, providing multiple access points for the Lavilla and Brooklyn neighborhoods, as well as establishing the future opportunity to connect to the McCoy's Creek Greenway.  | CIP Amend<br>2021-<br>349-E |                                      | \$8,740,200 |             |             |             |   | Recreation &<br>Open Space 1.3<br>and<br>Transportation 4.1 |   |
| Firestone Rd- Wheat<br>Rd Intersection<br>Improvements           | Install traffic signal, pedestrian crossings, and drainage improvements on intersection approaches.   | CIP<br>2021-505-E           |                                      |             |             |             |             |   | Transportation 2.1  |   |
| Five Points Project-<br>Improvements                             | This project provides modifications to existing roadway infrastructure within the Five Points area to enhance pedestrian utilization and improve vehicular safety. Within this area the improvements will impact: Park Street, Post Street, Margaret Street, Lomax Street, Oak Street and Herschel Street. Improvements include turning Lomax Street into a one-way eastbound street, expanded sidewalk areas, reduced roadway widths for safer pedestrian crossings and the retention of the historic beacon that sits at the heart of the Five Points intersection. | CIP<br>2021-505-E           |                                      |             |             |             |             |   | Transportation 2.1<br>and 4.1                               | \$3,250,000   |

|--|--|----------------|--------------------------------|-------------|-------------|-------------|-----------|-----------|------------|--|
| Flasher Clocks for School Zones                            | Convert all School Zones on city roads to full electric flash indications  | CIP 2021-505-E |                                | \$500,000   | \$500,000   | \$500,000   | \$500,000 | \$500,000 | \$500,000  | Transportation 2.1                                     |
| Hodges Boulevard Intersection Traffic Signals              | Install two (2) traffic signals and fiber optic interconnect at the intersections of Hodges Blvd and Hunt Club Rd as well as Hodges Blvd and Montebello Way/Banforth Drive West  | CIP 2021-505-E |                                | \$2,200,000 |             |             |           |           |            | Transportation 2.1                                     |
| Hyatt Front Modifications                                  | Design and construction of modifications to the front of Hyatt downtown to pre-Costline Drive Bridge impacts conditions.   | CIP 2021-505-E |                                | \$300,000   |             |             |           |           |            | Transportation 2.1                                     |
| Lone Star Road Extension                                   | Project will extend Lone Star Road from the eastern most current terminus (just east of Mill Creek Road) to Tredwick Parkway. The project consists of the design and construction of the roadway extension to connect Lone Star Road with the Tredwick Parkway/Southside Blvd interchange in order to improve mobility in the area.  | CIP 2021-505-E |                                |             | \$1,000,000 | \$2,000,000 |           |           |            | Transportation 2.1                                     |
| Luna, Green & Melba Street Bicycle Project                 | This project will design, construct, and perform inspection services for the construction of a bicycle boulevard approximately 3400 linear feet along Luna Street, Green Street and Melba Street from Lenox Ave to Post St. in the Murray Hill neighborhood. The scope will be determined on the bicycle boulevard design guidelines and may include shared bicycle lane markings "sharrows", traffic striping and signage for bicycles. | CIP 2021-505-E |                                |             |             |             |           |           |            | Transportation 4.1                                     |
| Main Street Traffic Calming (1st to 12th Street)           | Improvements to intersections to provide for left turns as well as increase and enhance pedestrian areas from 1st to 12th Street along Main Street. This in partnership with an FDOT resurfacing project.  | CIP 2021-505-E |                                |             | \$1,200,000 |             |           |           |            | Transportation 2.1                                     |
| Merrill Rd and Townsend Blvd Intersection Improvements     | This project will improve the intersection which has one of the City's highest vehicle accident rates. The intersection will be improved with a concrete curb median added to eliminate cross-lane movements. Access driveways will be eliminated that are too close to the intersection. The traffic signal system will be replaced with a current standard installation.   | CIP 2021-505-E |                                | \$575,000   |             |             |           |           |            | Transportation 2.1                                     |
| Mickler Road Widening                                      | Widen Mickler Rd. from Larkin Rd. to school entrance.  | CIP 2021-505-E |                                |             |             |             |           |           |            | Transportation 2.1                                     |
| Moncrief Rd. and W. 20 <sup>th</sup> St. Road Improvements | Install cul-de-sac on 20th St. to remove connection to Moncrief Rd. and create on-street parallel parking spaces.  | CIP 2021-505-E |                                |             |             | \$350,000   |           |           |            | Transportation 2.1                                     |

Ordinance 2022-120-E

FY 2022-2026 Capital Improvements Element (CIE) Schedule

**Roads, Infrastructure, Transportation**

| Project Name  | Description  | Source               | FY 20-21 Amendments to the CIP | FY 21-22    | FY 22-23     | FY 23-24     | FY 24-25    | FY 25-26    | Beyond 5th  | Element Goal, Objective Showing Comp Plan Consistency |
|---|--|----------------------|--------------------------------|-------------|--------------|--------------|-------------|-------------|-------------|---|
| New Berlin Rd. (Cedar Point to Starratt/ Pulaski Rd. Int) | Traffic study and concept design for road improvement align New Berlin Road. The limits of the improvements are along New Berlin Road from Cedar Point Road to the intersection of Starratt Road and Pulaski Road.   | CIP 2021-505-E       |                                |             | \$20,000,000 | \$20,000,000 |             |             |             | Transportation 2.1                                    |
| Oak Street Bicycle Boulevard                              | This project will design, construct, and perform inspection services for the construction of a bicycle boulevard along Oak St., beginning at King St. and proceeding South along Oak St., through Willow Branch Park, to Challen Ave., and then West to Herschel St., and then South on Herschel St., to St. Johns Ave. intersection. The total length of the proposed bike route is approximately 9,787' feet, or 1.8 miles. The scope of the work will add traffic striping, signage for a bike lane, upgrade crosswalks, and add traffic calming devices including possible lane width reduction. | CIP 2021-505-E       |                                |             |              |              |             | \$350,000   |             | Transportation 4.1                                    |
| Orange Picker / Brady Road - Mandarin                     | This project will acquire two parcels along Orange Picker and Brady Roads, environmental remediation and demolition of any structures for the expansion of the parking area located at Alberts Field as well as roadway intersection improvements.   | CIP 2021-505-E       |                                | \$4,700,000 |              |              |             |             |             | Transportation 2.1                                    |
| Palm Avenue Improvements                                  | The project will include signalization improvements, reconstruction of intersections of Palm Avenue, Gary Street, Baptist Way and Prudential Drive. Project improvements include turn lanes, sidewalks, drainage, bike lanes, landscaping, hardscaping and lighting enhancements.  | CIP Amend 2021-380-E | \$3,710,000                    |             |              |              |             |             |             | Transportation 2.1                                    |
| Pavement Markings   | Public Works is responsible for over 3,600 miles of roadways and the pavement markings continue to deteriorate. This funding supports on-going replacement of pavement marking to ensure adequate safety levels of our travel ways.  | CIP 2021-505-E       |                                | \$2,000,000 | \$1,500,000  | \$1,500,000  | \$1,000,000 | \$1,000,000 | \$1,000,000 | Transportation 2.1                                    |
| Penman Road Complete Streets                              | Install three (3) high-emphasis painted crosswalks with Rapid Rectangular Flashing Beacons (RRFB) and associated concrete sidewalk along Penman Rd. in Jacksonville Beach.   | CIP 2021-505-E       |                                | \$500,000   | \$2,000,000  | \$10,000,000 | \$7,500,000 |             |             | Transportation 4.1                                    |
| Post Street Dock Streetscape                              | Design and construction of enhanced parking, wider sidewalks, lighting improvements, and landscaping improvements.   | CIP 2021-505-E       |                                |             |              |              |             |             | \$3,400,000 | Transportation 2.1                                    |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Project Name                                 | Description  | Source         | FY 20-21 Amendments to the CIP | FY 21-22     |              |              | FY 22-23     |              |              | FY 23-24     |  |  | FY 24-25 |  |  | FY 25-26 |  |  | Element Goal, Objective Showing Comp Plan Consistency |                          |
|--|--|----------------|--------------------------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--|--|----------|--|--|----------|--|--|---|--------------------------|
|  |  |                |                                | FY 21-22     | FY 22-23     | FY 23-24     | FY 24-25     | FY 25-26     | Beyond 5th   |              |  |  |          |  |  |          |  |  |   |                          |
| Racetrack Road Widening                      | This project is to improve one remaining 2-lane segment of road (approx. 1.15 miles) to 4-lanes for Race Track Road. This segment runs from 98 overpass east across I-95 to Fairtram Springs. FDOT has included in its CIP for the replacement of the existing I-95 overpass to allow for 4-lanes. For the remaining 2-lanes of Race Track Road to be improved to 4-lanes, there is a .81 mile segment that requires funding and construction.   | CIP 2021-505-E | \$9,441,250                    |              |              |              |              |              |              |              |  |  |          |  |  |          |  |  |   | Transportation 2.1       |
| Railroad Crossings                           | This allocation funds countywide railroad crossing maintenance. The City has long standing agreements with the major railroad companies that place the maintenance and repair cost of railroad crossings on the City. By agreement, the City has to have funds available at all times to pay for any work that may be deemed necessary by the railroads.   | CIP 2021-505-E | \$750,000                      | \$750,000    | \$750,000    | \$750,000    | \$750,000    | \$750,000    | \$750,000    | \$225,000    |  |  |          |  |  |          |  |  |   | Transportation 2.1       |
| Roadway Resurfacing                          | This allocation funds resurfacing of City roads throughout Jacksonville. The City is responsible for approximately 3.682 miles of paved centerline roadway. Resurfacing includes full milling and resurfacing, micro-surfacing and rejuvenation of City roadways. All of these treatments extend the lifespan of existing city roadways. Program Management Services for the Pavement Management program are also included in this project. A portion of this project is being funded by Community Development Block Grant (CDBG) grant funding. | CIP 2021-505-E | \$25,500,000                   | \$24,000,000 | \$27,000,000 | \$27,000,000 | \$27,000,000 | \$27,000,000 | \$27,000,000 | \$18,000,000 |  |  |          |  |  |          |  |  |   | Transportation 2.1       |
| Roadway Safety Project- Pedestrian Crossings | Improve existing pedestrian crossings and install pedestrian crossing at unmarked sites on City right of way. Some locations may require pavement markings and signage and other locations may require Rectangular Rapid Flashing Beacons (RRFB).  | CIP 2021-505-E | \$300,000                      | \$300,000    | \$300,000    | \$300,000    | \$300,000    | \$300,000    | \$300,000    | \$300,000    |  |  |          |  |  |          |  |  |   | Transportation 4.1       |
| Roadway Sign Stripe and Signal               | This project supports the Traffic Engineering Division's county-wide effort to re-stripe and re-sign deficient roadways. Additional efforts include signal repair and replacement or enhancement of traffic signal equipment.  | CIP 2021-505-E | \$2,500,000                    | \$2,700,000  | \$2,700,000  | \$2,700,000  | \$2,700,000  | \$2,700,000  | \$2,700,000  | \$1,350,000  |  |  |          |  |  |          |  |  |   | Transportation 2.1       |
| Rogero Road Undergrounding Electric          | Installing underground electric cables, pull boxes and necessary electrical elements to place electrical service underground.  | CIP 2021-505-E | \$877,000                      |              |              |              |              |              |              |              |  |  |          |  |  |          |  |  |   | Capital Improvements 1.1 |

Ordinance 2022-120-E

| Soutel Drive & New Kings Road Intersection Improvements            | Project to improve the intersection of Soutel Drive and New Kings Road to provide dual left turn lanes for westbound to southbound movement, widen northeast leg of intersection, acquire ROW from the east side of Soutel Dr., relocate utilities, relocate drainage inlets and modify FDOT traffic signals.                      | CIP 2021-505-E |                                | \$672,000   |             |           |           |
| Southside Boulevard - Southside Blvd./ Belfort Rd. / JTB Trans Imp | Design and construction of improvement identified in the TMA study.  | CIP 2021-505-E |                                | \$1,120,000 | \$8,000,000 |           |           |
| St. Johns Ave. Traffic Calming                                     | Traffic calming is desired within the Riverside neighborhood to slow motorized traffic, enhance safe pedestrian crossings and help position parked vehicles away from corners to provide better sight distance. This project will install curb extensions, shorten pedestrian crossing distances and provide area for landscaping. | CIP 2021-505-E |                                | \$50,000    | \$200,000   |           |           |
| Traffic Calming  | The project is a Countywide project to help alleviate traffic. This funding will be used to calm traffic in areas throughout the county where speed humps and other traffic calming devices can be implemented.  | CIP 2021-505-E |                                | \$150,000   | \$200,000   | \$200,000 | \$150,000 |
| Traffic Signal (New) - Argyle Forest Blvd. & Loch Highlands        | New traffic signal at Argyle Forest Boulevard and Loch Highlands Boulevard.  | CIP 2021-505-E |                                | \$900,000   |             |           |           |
| Traffic Signal (New) - Baymeadows Rd. E & Hampton                  | New traffic signal at Baymeadows Road East and Hampton Park Boulevard.   | CIP 2021-505-E |                                |             | \$700,000   |           |           |
| Traffic Signal (New) - Baymeadows Rd. E & Stonebridge Village      | Two-way traffic signal at Baymeadows Road East and Stonebridge Village Condominiums.   | CIP 2021-505-E |                                |             | \$700,000   |           |           |

| Traffic Signal (New) - New Berlin Rd & Cedar Point Rd  | New traffic signal at New Berlin Road and Cedar Point Road.  | CIP 2021-505-E |                          |             | \$1,000,000 |             |             |              |             | Transportation 2.1  |
| Traffic Signal – Airport Center Dr. and Gillespie Ave. | Install traffic signal with pedestrian crossings features.   | CIP 2021-505-E |                          | \$700,000   |             |             |             |              |             | Transportation 2.1  |
| Traffic Signal – Pulaski Rd and Howard Rd              | Install traffic signal with pedestrian crossings features.   | CIP 2021-505-E |                          | \$600,000   |             |             |             |              |             | Transportation 2.1  |
| Traffic Signalization – Countywide                     | The purpose of this project is to provide funding for signalization of intersections. When the Traffic Engineering Division deems that an intersection meets the criteria for signalization, these funds will provide the resources to design and install the necessary traffic signals.   | CIP 2021-505-E |                          | \$800,000   | \$1,100,000 | \$1,100,000 | \$1,100,000 | \$550,000    | \$550,000   | Transportation 2.1  |
| Traffic Signalization – Enhancements                   | Calculate the traffic signal clearance periods for each approach of city traffic signals and program the information into the traffic signal controller.   | CIP 2021-505-E |                          | \$160,000   | \$160,000   | \$160,000   | \$160,000   | \$80,000     | \$80,000    | Transportation 2.1  |
| Traffic Signalization – Fiber Optic                    | The project will provide communications to the traffic signals along selected City arterials. A communication link to a traffic signal controller will allow for remote assessment of signal issues, provide automated warning for power outages, allow for video capability, and remote real time observation of the intersection and corridor.   | CIP 2021-505-E |                          | \$750,000   | \$750,000   | \$750,000   | \$750,000   | \$750,000    | \$750,000   | Transportation 2.1  |
| Traffic Signals San Pablo Parkway                      | Install traffic two (2) signals and fiber-optic interconnect cable.  | CIP 2021-505-E |                          | \$2,400,000 |             |             |             |              |             | Transportation 2.1  |
| Traffic Street Lights (mast arm paint)                 | Countywide effort to provide funding for lighting projects.  | CIP 2021-505-E |                          | \$100,000   | \$100,000   | \$100,000   | \$100,000   | \$100,000    | \$100,000   | Transportation 2.1  |
| University Boulevard (Complete Streets Project)        | Transforming 6,500 feet of University Boulevard by milling and resurfacing with potential improvements to include reduced travel lane widths, construction of buffer bike lanes, mid-block crossings, reconfiguration of the Burdette/lake Lucina intersection, high-emphasis crosswalks, and installation of a median where left turning movements are not compromised. The final project scope will be determined through stakeholder meetings and design development. | CIP 2021-505-E |                          |             |             |             |             | \$10,000,000 | \$9,500,000 | Transportation 2.1  |

FY 2022-2026 Capital Improvements Element (CIE) Schedule

**Roads, Infrastructure, Transportation**

| Project Name                         | Description   | Source         | FY 20-21 Amendments to the CIP | FY 21-22 | FY 22-23 | FY 23-24 | FY 24-25 | FY 25-26 | Beyond 5th  | Element, Goal, Objective Showing Comp Plan Consistency |                    |
|--------------------------------------|---|----------------|--------------------------------|----------|----------|----------|----------|----------|-------------|--|--------------------|
| Collins Road Sidewalks               | Design and construction of sidewalk on one side of Collins Road from Pineverde Lane to Matera Avenue.   | CIP 2021-505-E |                                |          |          |          |          |          | \$4,100,000 | Transportation 4.1                                     |                    |
| Hardscape-Countywide                 | This allocation funds countywide repairs to the city's existing Hardscape features. These features include items found within the right-of-way that are considered to be specialty, including but not limited to: sidewalk pavers, textured crosswalks, stamped/colorized asphalt, etc. The repairs are focused on system restoration to ensure that all components function in accordance with their intended purpose. The funding is projected to be used for continuing maintenance contract services. | CIP 2021-505-E |                                |          |          |          |          |          | \$1,000,000 | Transportation 2.1 and 4.1                             |                    |
| Loretto Road Sidewalk                | Construction includes concrete sidewalk and driveways, curb and gutter sections and drainage improvements consisting of drainage structures, pipe, and new ditches. This project will extend the sidewalk on the south side of Loretto Road from County Dock Road to Mandarin Road.   | CIP 2021-505-E |                                |          |          |          |          |          |             | Transportation 4.1                                     |                    |
| Mandarin Road Sidewalk               | This allocation funds the construction of new sidewalks in accordance with the Pedestrian Safety Improvement Program criteria throughout Jacksonville on Mandarin Road. Funding will be used for installation of new sidewalks that will help to address pedestrian safety and mobility issues. Project includes the construction of sidewalks from Red Cypress Drive to Rivergate.   | CIP 2021-505-E |                                |          |          |          |          |          | \$700,000   | Transportation 4.1                                     |                    |
| Ortega Boulevard Sidewalks           | Design and construction of sidewalk along one side of Ortega Boulevard from Yacht Club Road to Grand Avenue   | CIP 2021-505-E |                                |          |          |          |          |          |             | \$4,900,000  | Transportation 4.1 |
| Plummer Grant Sidewalk (New)         | This allocation funds the construction of new sidewalks in accordance with the Pedestrian Safety Improvement Program criteria throughout Jacksonville on Plummer Grant Road. Funding will be used for installation of new sidewalks that will help to address pedestrian safety and mobility issues. Project includes the construction of sidewalks from Old St. Augustine Road to Juilington Creek Road.   | CIP 2021-505-E |                                |          |          |          |          |          | \$300,000   | Transportation 4.1                                     |                    |
| San Mateo Elementary School Sidewalk | Build approximately 1200' of sidewalk along the north side of Eastport Road and across railroad tracks (will need Railroad approval). Add crosswalks and a flashing school zone to aid students walking from the eastport Apartments to San Mateo Elementary School. (New funding)  | CIP 2021-505-E |                                |          |          |          |          |          | \$600,000   | Transportation 4.1                                     |                    |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Roads, Infrastructure, Transportation             |   |                      |                                      |             |             |             |          | Element, Goal,<br>Objective Showing<br>Comp Plan<br>Consistency |                                     |
|---|---|----------------------|--------------------------------------|-------------|-------------|-------------|----------|---|-------------------------------------|
| Project Name                                      | Description   | Source               | FY 20-21<br>Amendments<br>to the CIP | FY 21-22    | FY 22-23    | FY 23-24    | FY 24-25 | FY 25-26  | Beyond 5th                          |
| Sibbald Road Sidewalk Extension                   | Project is the design and construction of new sidewalk on Sibbald Road, extending north from Archery Avenue to Trout River Boulevard. This will be a continuation of the existing sidewalk on Sibbald Road between Soutel Drive and Archery Avenue.   | CIP 2021-505-E       |                                      | \$699,446   | \$1,500,554 |             |          |   | Transportation 2.1 and Drainage 1.4 |
| Sidewalk Construction- New                        | This allocation funds the construction of new sidewalks in accordance with the Pedestrian Safety Improvement Program criteria throughout Jacksonville. Funding will be used for installation of new sidewalks to complete missing gaps that will help to address pedestrian safety and mobility issues.   | CIP 2021-505-E       |                                      | \$1,000,000 | \$1,000,000 | \$1,000,000 |          | \$500,000   | Transportation 4.1                  |
| Sidewalk/Curb Construction and Repair             | This allocation funds the repair of existing deteriorated/damaged sidewalks throughout Jacksonville. This includes repairs to hazardous sidewalks by removing and replacing sidewalk panels and by horizontal cutting. This effort helps to address pedestrian safety and mobility issues.  | CIP 2021-505-E       |                                      | \$6,665,000 | \$6,000,000 | \$6,000,000 |          | \$3,000,000   | Transportation 4.1                  |
| St. Johns Bluff Sidewalk Improvements -East Side  | Additional funding for construction of 11,000 LF of new sidewalk on the east side of St. Johns Bluff from Saints Road north to Atlantic Blvd.   | CIP 2021-505-E       |                                      |             | \$860,000   |             |          |   | Transportation 4.1                  |
| St. Johns Bluff Sidewalk Improvements - West Side | Additional funding for construction of the missing sections of sidewalk on the west side of St. Johns Bluff Road between Beach Blvd and Alden Road.   | CIP 2021-505-E       |                                      |             | \$155,000   |             |          |   | Transportation 4.1                  |
| Trout River Blvd Sidewalk (new)                   | This allocation funds the construction of new sidewalks in accordance with the Pedestrian Safety Improvement Program criteria throughout Jacksonville on Trout River Blvd. Funding will be used for installation of new sidewalks that will help to address pedestrian safety and mobility issues. Project includes the construction of sidewalks from Old Kings Road to New Kings Road (approximately 3,300 ft) and includes a railroad pedestrian crossing. | CIP 2021-505-E       |                                      |             |             |             |          | \$300,000   | Transportation 4.1                  |
| Winton Drive Park (Art in Public Places)          | Art to be added to the Winton Drive Triangle located at the corner of Winton Drive and Howell Drive.  | CIP Amend 2021-887-E |                                      | \$18,833    |             |             |          | \$1,500,000   |                                     |
|   |   |                      |                                      |             |             |             |          |   | Capital Improvements Element 1.1    |

## FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Roads, Infrastructure, Transportation                   |  |                      |                                      |               |          |          |          | Element Goal,<br>Objective Showing<br>Comp Plan<br>Consistency |            |                                  |
|---|--|----------------------|--------------------------------------|---------------|----------|----------|----------|--|------------|----------------------------------|
| Project Name  | Description  | Source               | FY 20-21<br>Amendments<br>to the CIP | FY 21-22      | FY 22-23 | FY 23-24 | FY 24-25 | FY 25-26   | Beyond 5th |                                  |
| Art in Public Places                                    | Pursuant to Chapter 123, Part 9 Ordinance Code, this project will allow the Cultural Council to accomplish administration, maintenance and construction of public art throughout the City of Jacksonville. | CIP Amend 2021-887-E |                                      | -\$18,833     |          |          |          |  |            | Capital Improvements Element 1.1 |
| Southside Senior Center (Art in Public Places)          | Beach and Peach Park: This project will pay for the cost of an Art in Public Places three dimensional piece of art at Southside Senior Center  | CIP Amend 2022-31-E  |                                      | -\$32,000     |          |          |          |  |            | Capital Improvements Element 1.1 |
| McCoy's Creek Greenway -McCoy's Creek Boulevard Closure | Proposed closing of the McCoy's Creek Blvd right-of-way providing for new open space park improvements to include but not limited to pedestrian/bike paths, green space and creek restoration.             | CIP Amend 2021-782-E |                                      | \$444,965     |          |          |          |  |            | Recreation and Open Space 2.1    |
| MPS Garage Purchase                                     | Purchase of three (3) structure parking facilities; two (2) garages in the Sports Complex and one (1) garage adjacent to the Duval County Courthouse.  | CIP Amend 2022-138-E |                                      | -\$32,905,000 |          |          |          |  |            | Capital Improvements Element 1.1 |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Environmental / Quality of Life                     |   |                   |                                |          |          |          |                                   |
|---|---|-------------------|--------------------------------|----------|----------|----------|-----------------------------------|
| Project Name  | Description   | Source            | FY 20-21 Amendments to the CIP | FY 21-22 | FY 22-23 | FY 23-24 | FY 24-25                          |
| 8th Street- I-95 to Blvd Landscaping/ Tree Planting | The project scope is design and construction of Streetscape improvements along 8th Street from I-95 to Jefferson Street. Landscaping, tree planting & hardscape improvements (brick pavers, irrigation, historic lighting, benches, etc.) within the existing 8th Street right-of-way to match the recently completed streetscape improvements on Jefferson Street between 8th Street and 10th Street.  | CIP<br>2021-505-E |                                |          |          |          | \$1,300,000<br>Transportation 2.1 |
| Corridors of Significance                           | This funding will be used to renovate the landscaping at medians on the following corridors: Main St, Roosevelt Blvd, Monument Rd and Wonderwood Dr   | CIP<br>2021-505-E |                                |          |          |          | \$1,009,000<br>Transportation 2.1 |
| Downtown Pocket Parks                               | Landscape renovation of 10 Downtown Pocket Parks and medians: Riverside Ave, Median (bet Peninsular Pl and Edison Av), Water Street Median (bet Broad and Pearl St), Water St Pocket Park, Bay and Broad Street Pocket Park, Independent Drive/Main Street Bridge Ramp, Jessie Smith Pocket Park, Main Library Pocket Park, Howard's Island, Sister City Park, State/Union/Liberty median.  | CIP<br>2021-505-E |                                |          |          |          | \$474,000<br>Transportation 2.1.4 |
| JAX Ash Site Pollution Remediation                  | The ash remediation program is a Superfund Site composed of four areas of the City where municipal solid waste was burned in an incinerator as a method of treatment to render the material inert prior to disposal. The incinerator ash was deposited in areas of Jacksonville in the early to mid 1900's and consists of approximately 3,700+ sites in four areas: Browns Dump, Forest Street, 5th and Cleveland and Lorraine Miller. Due to the inefficient technology of the time, the solid waste materials were not rendered inert and resulted to contain elevated levels of heavy metals and polynuclear aromatic hydrocarbons above federal regulatory levels. The approved remediation method is to excavate the upper two feet of soil, replace with clean backfill, place institutional and engineering controls on the parcel. The ash is used as daily cover for the Trail Ridge landfill. The program is overseen by the EPA and administered by the Solid Waste Division. | CIP<br>2021-505-E |                                |          |          |          | \$2,000,000<br>Solid Waste 1.3    |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Environmental / Quality of Life             |   |                |                                |          |             |             |             |
|---|---|----------------|--------------------------------|----------|-------------|-------------|-------------|
| Project Name                                | Description   | Source         | FY 20-21 Amendments to the CIP | FY 21-22 | FY 22-23    | FY 23-24    | FY 24-25    |
| Landscape Renovations at Jax Public Library | This funding will be used for landscape renovations at the following libraries: Charles Webb Wesconnett, Bradham Brooks, and the Regency Square library. The landscaping at each libraries is in poor condition caused by overuse and an inadequate budget for maintenance, which now presents a poor visual impression to the public. FY20/21 funding will be used to landscape the Regency Branch Library.  | CIP 2021-505-E |                                |          | \$342,000   |             | \$400,000   |
| Median Beautification                       | Renovation of landscape and irrigation on various street medians throughout Jacksonville that are in poor condition. Examples of these are Water Street medians (Broad St. to Hogan St.) and Riverside Ave. medians (Gilmore St. to Rossell St.)  | CIP 2021-505-E |                                |          |             |             | \$200,000   |
| Sunset Cemetery Assessment/Restoration      | Assessment and restoration of Sunset Cemetery located in Northwest Jacksonville. Assessment includes boundaries, grave restoration and vegetation. Restoration includes establishment of fence boundaries, roadway through facility, grave restoration and vegetation management.   | CIP 2021-505-E |                                |          | \$1,300,000 |             |             |
| Landfill Gas Fueled Leachate Evaporator     | Trail Ridge & North Duval Municipal Landfills generate a significant amount of leachate that requires disposal. Leachate is collected in storage tanks, transported by tanker truck to JEAT's Buckman St. Wastewater Treatment plant and is causing permit exceedances where JEAT is requiring the City to pay higher disposal fees to compensate for the added work to keep the facility in compliance. Construction of an evaporator unit using the landfill gas generated by the expansion area for leachate disposal will provide an offset to the ever increasing leachate disposal costs. | CIP 2021-505-E |                                |          |             | \$1,000,000 | \$7,200,000 |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Environmental / Quality of Life       |   |                        |                                      |             |          |          |             | Element, Goal,<br>Objective Showing<br>Comp Plan<br>Consistency |              |                 |                        |                         |
|---------------------------------------|---|------------------------|--------------------------------------|-------------|----------|----------|-------------|---|--------------|-----------------|------------------------|-------------------------|
| Project Name                          | Description   | Source                 | FY 20-21<br>Amendments<br>to the CIP | FY 21-22    | FY 22-23 | FY 23-24 | FY 24-25    | FY 25-26  | Beyond 5th   |                 |                        |                         |
| Trail Ridge Landfill Expansion        | Trail Ridge Landfill has only 4 years of air space left for the disposal of solid waste, with 18 months of operational air space. The site has approximately 977 acres of which 400 are occupied by existing landfill footprint and supporting infrastructure. The remaining 577 acres are located to the north of the current disposal hill. The landfill expansion into this 577 acre area will provide landfill capacity to Duval County residents at the current lowest feasible disposal cost for approximately 33 years of capacity. The expansion of the existing hill to the north into the first disposal unit along the north face of the current hill will capture a "valley", and provide \$150 million in new revenue to the City for the first 5-10 years of operations. The hill is approaching the time frame when there will be no space available for the placement of the ash materials the City is required to dispose of per the Consent Decree with US EPA. Loss of the hill as the disposal site due to capacity constraints would result in an increased cost of \$15-200,000,000 to the ash program. | CIP<br>2021-505-E      | \$11,396,650                         | \$1,089,000 |          |          | \$2,945,715 | \$7,273,563   | \$47,300,000 | Solid Waste 1.4 |                        |                         |
| Environmental Compliance - Countywide | This project focuses on the cleanup of various contaminated sites throughout the City. These dump sites are subject to a Memorandum of Understanding between the City of Jacksonville and the Florida Department of Environmental Protection to assess and remediate unlined dumps and any other contaminated sites the City owns or is designated as the Principal Responsible Party of cleanup. Examples of locations include the Imeson Landfill, Henna Road, Linden Avenue, Burke Street Pond and Confederate Park.   | CIP<br>2021-505-E      |                                      |             |          |          | \$3,000,000 | \$1,000,000   | \$2,000,000  | \$5,000,000     | \$3,100,000            | Solid Waste 1.3 and 1.4 |
| Downtown Landscape Enhancements       | The purpose of this project is to enhance, replace and/or add lighting and landscape at various areas throughout Downtown.  | CIP Amend<br>2022-24-E |                                      |             |          |          | \$25,000    |   |              |                 | Transportation<br>2..1 |                         |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Public Safety  |   |                      |                                |             |             |             |             |
|--|---|----------------------|--------------------------------|-------------|-------------|-------------|-------------|
| Project Name   | Description   | Source               | FY 20-21 Amendments to the CIP | FY 21-22    | FY 22-23    | FY 23-24    | FY 24-25    |
| Fire Station Capital Maintenance - MISC Improvements | This project will provide miscellaneous repairs to fire stations countywide. These repairs include roof repairs, interior repairs/renovations, HVAC and air quality improvements, repairs related to water intrusion and various other repairs.   | CIP 2021-505-E       |                                | \$1,000,000 | \$1,000,000 | \$1,000,000 | \$1,000,000 |
| Fire Station #10 Renovation                          | The property and structures behind Fire Station 10 (Roosevelt and McBuff) are being offered for sale. JFRD will use the purchased properties to create drive through bays. This will enhance firefighter safety by eliminating the need to back into the bays. Due to expansion of services at FS-10, JFRD needs to expand the fire station. This will include adding additional living quarters, restroom facilities, and locker room.   | CIP 2021-505-E       |                                | \$2,220,000 |             |             |             |
| Fire Station #4                                      | This project includes an additional bay to be added to the main station for the rescue unit, which will assist with decreased response times along with medication and equipment security. JFRD added a rescue to Station 4 in March of 2017. Currently, the station has two bays attached to the main station. The rescue is currently housed in an outbuilding approximately 100' from the main station.  | CIP 2021-505-E       |                                | \$930,000   |             |             |             |
| Fire Station #47 (new)                               | The project includes determining the proper location and subsequent purchase of a suitable property for the construction and staffing of a new JFRD Fire Station #47. Station would include an engine and a rescue unit.  | CIP 2021-505-E       |                                | \$7,700,000 |             |             |             |
| Fire Station #22 (Relocation)                        | Current Fire Station 22 was constructed in 1966 as a "volunteer" station. The station is grossly underized for the number of personnel and apparatus assigned there.  | CIP 2021-505-E       |                                | \$5,700,000 |             |             |             |
| Fire Station #22 (Replacement)                       | Purchase land for the construction of Fire Station #22 in the vicinity of Lane Avenue and Lenox Avenue. The current Fire Station #22 is grossly undersized for the number of personnel and apparatus assigned there. The Capital Study by the National Fire Services Office conducted in May 2020, recommended relocation of the existing fire station and construction of a replacement station. The move to the North will help reduce run volumes for Fire Station 32, 17 and 10 and provide adequate space for the apparatus and personnel necessary to meet the high demand for emergency services in this area. | CIP Amend 2021-445-E |                                | \$500,000   |             |             |             |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Public Safety                  |   |                      |                                      |             |             |             | Element, Goal,<br>Objective showing<br>Comp Plan<br>Consistency |             |                          |

| Fire Station #17 Replacement   | Replace old Fire Station #17 located at 710 Huron Street. Replacement will include adding space for a new rescue unit and additional space for fire training, community programming and a voting precinct. The existing area will be cleared and turned into green space. A new Rescue unit is included in this enhancement.  | CIP 2021-505-E       |                                      | \$2,093,800 |             |             |   |             | Capital Improvements 1.1 |
| Fire Station #12 Replacement   | Replace old Fire Station #12. A Squad is currently located at this Station. The current station will be demolished and the new facility will be built on the existing parcel of land.   | CIP 2021-505-E       |                                      | \$1,875,064 |             |             |   |             | Capital Improvements 1.1 |
| Fire Station #66 (new)         | The project is the construction and staffing of a new fire station in the Merrill Rd. and Hartsfield community. A new Fire Engine and Rescue unit is included in this enhancement.  | CIP 2021-505-E       |                                      | \$7,700,000 |             |             |   |             | Capital Improvements 1.1 |
| Fire Station #67 (new)         | The project is the construction and staffing of a new fire station in the Frederickburg Ave. and Sibbald Rd. area. A new Fire Engine and Rescue unit is included in this enhancement.   | CIP 2021-505-E       |                                      |             | \$7,700,000 |             |   |             | Capital Improvements 1.1 |
| Fire Station #36 Replacement   | Relocate and replace old Fire Station #36 to the area of New Kings Rd. and Edgewood Avenue. An Engine and Rescue are currently located at this Station.   | CIP 2021-505-E       |                                      |             |             | \$5,700,000 |   |             | Capital Improvements 1.1 |
| Fire Station #25 Replacement   | Replace old Fire Station #25 located at 5423 Manor Drive. An Engine and Rescue unit are currently located at this Station.  | CIP Amend 2021-445-E |                                      | \$129,715   |             |             | \$7,700,000   |             | Capital Improvements 1.1 |
| Fire Station #45 Relocation    | The project is for the construction of a new fire station south of the current location on Sawpit Road. Personnel and equipment for existing engine, rescue unit and tanker would be transferred to the new location. The land on which the existing fire station is located was donated and would revert back to the original donor. An Engine and Rescue are currently located at this Station. | CIP 2021-505-E       |                                      |             |             |             |   | \$7,700,000 | Capital Improvements 1.1 |
| Marine Fire Station (new)      | This project includes determining the proper location and offendam purchase of a suitable property for the construction of a FRD Marine Fire Station to be located in southern Duval County.  | CIP 2021-505-E       |                                      |             |             |             |   | \$9,500,000 | Capital Improvements 1.1 |
| Fire Station #41 (Replacement) | Replace undersized Fire Station built in 1964 as a "Volunteer" Fire Station to accommodate emergency response personnel and modern day fire equipment sizes.  | CIP 2021-505-E       |                                      |             |             |             |   | \$7,700,000 | Capital Improvements 1.1 |

| Fleet Management-Maintenance and Upgrades                   | This is an old facility and the materials used to construct the building are increasingly difficult to repair due to the age. The funds will be used to install a TPO roofing system on the main building and the office to prevent water from entering the facility. Additionally funds will be used to mill, resurface and restripe the existing parking lot.  | CIP<br>2021-505-E |                                      | \$1,200,000  |              |           |           |   | \$1,825,000 | Capital Improvements 1.1 |
| Florida Theatre Elevator Modernization                      | This project will replace the obsolete mechanical, electrical and interior parts of the two existing passenger elevators.  | CIP<br>2021-505-E |                                      |              |              |           |           |   | \$600,000   | Capital Improvements 1.1 |
| Florida Theatre Facility Improvements                       | Funds for this project will be used for upgrading the stage lighting system, sound system, digital projection system, assistive listening system, theatre seating, repairs and restoration to the plaster and paint in the auditorium, replacing the HVAC system, restoring the marquee and canopy, improvements to the bathrooms, roof replacement, elevator upgrades and flooring repairs. This funding reflects the City's 50% partnership with the Florida Theater Performing Arts Center, Inc. (FTPAC). FTPAC will be contributing the remaining 50% for a total partnership contribution of \$5M over the 5 year period. | CIP<br>2021-505-E |                                      | \$1,500,000  | \$1,500,000  | \$250,000 | \$250,000 | \$250,000   | \$250,000   | Capital Improvements 1.1 |
| Jacksonville EOC Critical Electrical Infrastructure Upgrade | This project will replace the original electrical infrastructure equipment to include the main switch gears, main breakers, service feed and controls.   | CIP<br>2021-505-E |                                      | \$1,000,000  |              |           |           |   |             | Capital Improvements 1.1 |
| Jacksonville Fair Grounds Relocation                        | Relocation of the Jacksonville Fairgrounds to the Equestrian Center site.  | CIP<br>2021-505-E |                                      | \$15,000,000 | \$12,200,000 |           |           |   |             | Capital Improvements 1.1 |
| Jax Re-Entry Center-Roof Replacement                        | Replacement of Metal Roof.   | CIP<br>2021-505-E |                                      |              |              | \$400,000 |           |   |             | Capital Improvements 1.1 |
| JFRD Fire Station Apron & Driveway Repairs                  | This project identifies funds for making critical repairs to various fire station aprons and driveways city wide.  | CIP<br>2021-505-E |                                      | \$1,700,000  |              |           |           |   |             | Capital Improvements 1.1 |
| Lot R - Stadium Performance Center                          | This project will construct a 125,000 square foot facility to be used as the sports Performance Center Facility. This will include a "football factory"; natural grass fields, indoor fieldhouse, covered bleachers, restrooms and concession areas, public meeting space, and public art installations.   | CIP<br>2021-505-E |                                      | \$36,000,000 | \$24,000,000 |           |           |   |             | Capital Improvements 1.1 |

| Medical Examiner Facility                          | The District 4 Medical Examiner's Office building was originally constructed in 1968 as a single story building. There was a one story addition to the original building. Subsequently, in 1994 the City of Jacksonville accomplished a renovation of the existing building together with a secondary story addition and a build of the decomposition autopsy building.   | CIP<br>2021-505-E |                                      | \$10,000,000 | \$11,000,000 |           |           |   |            | Capital Improvements 1.1 |
| Montgomery Correctional Center Machine Shop        | Replace the existing Montgomery Correctional Center Machine Shop.   | CIP<br>2021-505-E |                                      | \$670,000    |              |           |           |   |            | Capital Improvements 1.1 |
| Old St. Andrews Church - Maintenance Upgrades      | This project will replace the leak protection for the stained glass, refinish the wood flooring and upgrade the sound system, kitchen and restrooms.  | CIP<br>2021-505-E |                                      |              |              |           |           |   | \$130,000  | Capital Improvements 1.1 |
| Police Memorial Building- Maintenance and Upgrades | The facility and its infrastructure are over 30 years old. Additionally this facility experiences heavy use on a daily basis, as such the wear and tear tends to be greater than that of a traditional government facility. Major issues which will be addressed with these funds are: phased in replacement of all air handling units, replacement of the backup chiller for the 911 call center, replacement of the HVAC controls with a building automation system, and replacement of the cooling tower used to provide chilled water to the air handlers which air condition the facility. | CIP<br>2021-505-E |                                      | \$275,000    | \$275,000    | \$275,000 | \$275,000 | \$275,000   | \$550,000  | Capital Improvements 1.1 |
| Pretrial Detention Facility - Cell Door System     | Replace metal cell doors, mechanical equipment and all electronic controllers and components of the cell door system.   | CIP<br>2021-505-E |                                      | \$500,000    | \$500,000    | \$500,000 | \$500,000 | \$500,000   | \$500,000  | Capital Improvements 1.1 |

| Pretrial Detention Facility - Maint & Upgrades          | The facility and its infrastructure are over 20 years old. Additionally this facility experiences heavy use on a daily basis, as such the wear and tear tends to be greater than that of a traditional government facility. Major issues which will be addressed with these funds are: Re-piping of the sanitary and domestic water lines, repair of the concrete stairs and shower pans (showers are leaking from floor to floor), replacement and upgrading of dorm lights and exit lights, a phased in replacement of the chillers and HVAC units, repair of the concrete eyebrows at three facades on the exterior of the building, and replacement of pneumatic HVAC controls. | CIP<br>2021-505-E | \$650,000                            |              |              |           |           |   |            | Capital<br>Improvements 1.1 |
| Pretrial Detention Facility Water Line Replacement      | This project will replace the hot and cold water riser water lines for all of the dorms in all floors of the facility.  | CIP<br>2021-505-E |                                      |              |              |           |           |   |            | Capital<br>Improvements 1.1 |
| Public Buildings - Roofing                              | Funds existing roofing contract that allows for roofing repairs and maintenance to all COJ roofs experiencing leaks.  | CIP<br>2021-505-E | \$400,000                            | \$400,000    | \$600,000    | \$600,000 | \$600,000 | \$600,000   |            | Capital<br>Improvements 1.1 |
| Public Works COOP                                       | This project will modify the currently vacant property to be used as a back up center for public works. The building would require some renovations and upgrades to include electrical, HVAC, fire protection, ADA and emergency back-up power to facilitate a fully functioning back-up center for the public works department.  | CIP<br>2021-505-E |                                      |              |              |           |           |   |            | Capital<br>Improvements 1.1 |
| Schell Sweet Community Resource Center Roof Replacement | This project will replace the flat roof sections with an upgraded TPO system that will protect the facility from leaks and water intrusion.   | CIP<br>2021-505-E |                                      |              |              |           |           |   |            | Capital<br>Improvements 1.1 |
| Tactical Research and Development Center                | Construction of a new tactical research and development center for SWAT research and development.   | CIP<br>2021-505-E | \$150,000                            |              |              |           |           |   |            | Capital<br>Improvements 1.1 |
| Traffic Engineering - Warehouse PH II                   | This project is to complete the build out of the new warehouse for Traffic Engineering.   | CIP<br>2021-505-E |                                      |              |              |           |           |   |            | Capital<br>Improvements 1.1 |
| UF Health Capital Improvements                          | Capital maintenance and capital improvements on city owned facilities.  | CIP<br>2021-505-E | \$20,000,000                         | \$20,000,000 | \$25,000,000 |           |           |   |            | Capital<br>Improvements 1.1 |
| Water Street Garage Elevator Modernization              | This project identifies funds to replace the existing electrical and mechanical equipment for the elevators at the Water St. Parking Garage.  | CIP<br>2021-505-E |                                      |              |              |           |           |   |            | Capital<br>Improvements 1.1 |

| Brentwood Branch Replacement      | To replace the Brentwood Branch Library with a new 20,000SF library in the same area. The new library would focus on serving children and teens as well as adult learners, and provide career services. The building would be sustainably constructed for energy savings. For adults an e-classroom would be a pivotal area of the building providing free training and classes. For children and teens, the space would be STEAM focused. Programs offered free by the library teach people how to apply for work, provide employment resources, teach computer skills and resume writing, and support student learning. | CIP<br>2021-505-E |                                      |          |          |          |          | \$8,188,976  | Capital<br>Improvements 1.1                                     |
| Brown Eastside Branch Replacement | Replace the Brown Eastside Branch Library with a new 20,000 square foot library in the same area. The new library would focus on serving children and teen's as well as adult learners. For children and teens, the space would be literacy and reading focused. Programs offered free by the library teach people how to read, how to apply for work, provide employment resources, teach computer skills and resume writing, and support student learning.  | CIP<br>2021-505-E |                                      |          |          |          |          | \$8,188,976  | Capital<br>Improvements 1.1                                     |
| Dallas Graham Branch Replacement  | Replace the Dallas Graham Branch Library with a new 25,000 square foot library in the same area. The new library would focus on serving children and teen's as well as adult learners. For children and teens, the space would be literacy and reading focused. Programs offered free by the library teach people how to read, how to apply for work, provide employment resources, teach computer skills and resume writing, and support student learning.   | CIP<br>2021-505-E |                                      |          |          |          |          | \$10,236,431 | Capital<br>Improvements 1.1                                     |
| Oceanway Library Replacement      | Construct a 30,000sf library complete with library materials, computers, children's area, teen area, community meeting rooms, study rooms, computer labs, wireless internet, and drive up book drop. The Oceanway area is an underserved area for JPL. The projected usage of this location would be 300,000 visits per year. Other than the lockers at the Oceanway Community Center, the closest library (Highlands Branch) to this area is over 10 miles away. The initial cost is for the purchase of the land in this area while good locations for a library remain available.                                      | CIP<br>2021-505-E |                                      |          |          |          |          | \$3,350,190  | Capital<br>Improvements 1.1                                     |

| Renovation of Beaches Branch Library                                | Libraries of today are changing from places where people consume information and obtain knowledge to places where they create information and put knowledge to work. The renovation of the 24,600sf library includes: children's area, teens area, additional study/conference spaces, security cameras, new furnishings, and associated electrical upgrades. Due to older outdated systems this library is not operating efficiently, both in its physical systems and in its set up for children, teens, entrepreneurs, and seniors. There are persistent issues in the functionality of the building that would be corrected in the renovation. | CIP<br>2021-505-E |                                      | \$592,310 | \$596,894 |          |          | \$1,196,972   | Capital<br>Improvements 1.1                                     |
| Westbrook Branch Replacement  | Replace the Westbrook Branch library with a new 20,000 square foot library in the same area. The new library would focus on serving children and teen's as well as adult learners, and provide career services. For children and teens, the space would be literacy and reading focused. Programs offered free by the library teach people how to read, how to apply for work, provide employment resources, teach computer skills and resume writing, and support student learning.   | CIP<br>2021-505-E |                                      |           |           |          |          | \$8,188,976   | Capital<br>Improvements 1.1                                     |
| 3,000 Bed Pretrial Detention Facility (replace existing facilities) | A 3,000 bed detention facility with the primary purpose of holding offenders who stay incarcerated past their initial court date, county sentenced or awaiting transfer to the state or other systems. This facility would house pretrial and post sentence offenders, and would take the place of the current Pretrial Detention Facility.  | CIP<br>2021-505-E |                                      |           |           |          |          | \$244,598,764 | Capital<br>Improvements 1.1                                     |
| 500 Bed Detention Facility/Short Term Holding                       | A 500 bed detention facility with the primary purpose of receiving, processing and housing short term offenders. This facility would house those inmates awaiting first appearance and the medically challenging inmates.  | CIP<br>2021-505-E |                                      |           |           |          |          | \$40,766,450  | Capital<br>Improvements 1.1                                     |

| Timucuan Trail Extension                      | Design and construction of the extension of the Timucuan Trail/East Coast Greenway south of the St. Johns River Ferry to Hanna Park and Fort Caroline.   | CIP 2021-505-E       |                                |              | \$5,000,000 |           | Recreation & Open Space 3.1         |
| TK Stokes Boat Ramp Bulkhead                  | Design, permitting and construction of bulkhead at the boat ramp.  | CIP 2021-505-E       |                                |              |             | \$200,000 | Recreation & Open Space 4.1 and 4.2 |
| Walter Anderson Memorial Park                 | This project consists of new restroom facilities and ADA walkways.   | CIP 2021-505-E       |                                |              |             | \$250,000 | Recreation & Open Space 2.1         |
| Wayne B Stevens Boat Ramp                     | Design and construct lighting for parking lot, roadway repairs and tree trimming. Replacement of [3] floating docks was completed in 2016.   | CIP 2021-505-E       |                                | \$250,000    |             |           | Recreation & Open Space 4.1 and 4.2 |
| Westside Park                                 | This project will provide resurfacing, shade structures, fitness and playground.   | CIP 2021-505-E       |                                |              |             | \$300,000 | Recreation & Open Space 2.1         |
| Yancey Park                                   | This project will design/renovate concession building, repair tennis courts, walkways and the parking area.  | CIP 2021-505-E       |                                |              |             | \$400,000 | Recreation & Open Space 2.1         |
| Shipyards Remediation and Park Development    | The project consists of the design, engineering, and construction of a replacement park for that portion of Metropolitan Park commonly referred to as KIDS KAMPUS. Construction includes environmental remediation, resiliency, and other construction and capital equipment costs associated with a world class public park facility. The Jessie Ball DuPont fund through their consultant team has developed a conceptual park and activation plan for the Shipyards, which will serve as the conceptual basis for this CIP Project. | CIP 2021-505-E       |                                | \$11,411,410 |             |           | Recreation & Open Space 2.1         |
| Winton Drive Recreational Facility            | De-authorization of funds  | CIP Amend 2021-326-E | -\$2,550,000                   |              |             |           | Recreation & Open Space 2.1         |
| Baldwin High School Batting Cage              | Construction of batting cages at Baldwin High School   | CIP Amend 2021-783-E |                                | \$205,860    |             |           | Recreation & Open Space 2.1         |
| Artist Walk - Riverside Avenue to Park Street | The project will provide an extension of the artist walk for one block from Riverside Avenue to Park Street to include a skate park and other hardscape and recreational amenities.  | CIP Amend 2022-46-E  |                                | \$5,000,000  |             |           | Recreation & Open Space 2.1         |
| Myrtle Avenue Area Court Complex              | Myrtle Avenue/l-95; lighting and Pickleball court development  | CIP Amend 2022-46-E  |                                | \$2,800,000  |             |           | Recreation & Open Space 2.1         |

| Drainage System Rehabilitation - Capital Improvements | This project will help fund design and major fixes, under \$100,000, to the City's drainage system. Once designs are complete, funds in this project may also be used to fund specific drainage projects which exceed \$100,000.   | CIP 2021-505-E | \$355,000                            | \$1,800,000 | \$1,800,000 | \$1,800,000 | \$1,800,000 | \$1,800,000   | \$1,800,000 | Drainage 1.4 |
| Beauderc Bluff Rd. (DSR) Capital Improvements         | Drainage improvements to alleviate flooding. Existing stormwater system will be replaced with larger pipes to improve drainage in this area.   | CIP 2021-505-E | \$322,000                            |             |             |             |             |   |             | Drainage 1.4 |
| Burnett Park Road (DSR) - Capital Improvement         | This project is meant to replace damaged drainage pipes and repair drainage ditches to provide positive flow and alleviate flooding issues.  | CIP 2021-505-E | \$248,000                            |             |             |             |             |   |             | Drainage 1.4 |
| Crest Drive (DSR)- Capital Improvements               | Installation of a catch basin at low point of Crest Drive to convey stormwater to existing drainage system.  | CIP 2021-505-E | \$149,000                            |             |             |             |             |   |             | Drainage 1.4 |
| Edgewood Circle (DSR) -Capital Improvements           | Construct a total 6 City standard curb inlets on Edgewood Circle and Edgewood Avenue South, and connect them to the existing City storm drain system. The project will install approximately 576 linear feet of 18 inch storm drain pipe and will include pavement repair, sidewalk repair, and restoration of landscaping.  | CIP 2021-505-E | \$329,000                            |             |             |             |             |   |             | Drainage 1.4 |
| Eunice Road (DSR) - Capital Improvements              | Adding inlets to improvement the drainage system to provide conveyance for stormwater runoff.  | CIP 2021-505-E | \$248,000                            |             |             |             |             |   |             | Drainage 1.4 |
| Spires Avenue (DSR)- Capital Improvements             | Drainage improvements to alleviate flooding that occurs in the area.   | CIP 2021-505-E | \$149,000                            |             |             |             |             |   |             | Drainage 1.4 |
| Drainage System Rehabilitation - Capital Maintenance  | This allocation funds countywide improvements to the City's stormwater drainage system. The improvements are focused on system restoration to ensure that all components function in accordance with their intended purpose. Components such as failed drainage lines and structures make up the majority of these improvements. The funding is projected to be used for continuing maintenance contract services. | CIP 2021-505-E |                                      |             |             |             |             |   |             | Drainage 1.4 |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Project Name   | Description   | Source            | FY 20-21                 | FY 21-22    | FY 22-23    | FY 23-24    | FY 24-25  | FY 25-26    | Beyond 5th | Element, Goal,<br>Objective Showing<br>Comp Plan<br>Consistency |
|--|---|-------------------|--------------------------|-------------|-------------|-------------|-----------|-------------|------------|---|
|  |   |                   | Amendments<br>to the CIP |             |             |             |           |             |            |   |
| Stormwater Pump Stations -Capital Maintenance          | This allocation funds countywide stormwater pump replacements and capital maintenance. The City currently has 12 pump stations countywide. Each pump station has multiple pumps present with some pump stations having as many as 4 pumps present. The funding is projected to be used for the replacement of deteriorated pumps and capital maintenance and repair as needed.  | CIP<br>2021-505-E |                          | \$150,000   | \$150,000   | \$150,000   | \$150,000 | \$150,000   | \$150,000  | Drainage 1.4  |
| Stormwater Project Development and Feasibility Studies | This allocation funds engineering studies that will evaluate various potential drainage projects throughout the City to determine which ones have cost effective solutions, define what the solutions are, identify what issues will need to be resolved and prepare project cost estimates.  | CIP<br>2021-505-E |                          | \$250,000   | \$250,000   | \$250,000   | \$250,000 | \$250,000   | \$250,000  | Drainage 1.4  |
| Dunn / Caney (Sapp Road Wet Detention)                 | The intent of this project is to improve water quality by improving approximately 1,000 ft. of channel conveyance in Caney Branch Creek and installing a .75 acre wet detention facility for water quality treatment. This project will contribute to the pollutant load reduction required by the Lower St. Johns River (LSR) Basin management Action Plan (BMAP) and NPDES permit requirements. (Project CN-1A in MSMP) | CIP<br>2021-505-E |                          | \$4,065,661 |             |             |           |             |            | Drainage 1.4  |
| Arlington/Pottsburg (Beach & Southside) Pond           | The intent of this project is to improve water quality by improving approximately 1,000 ft. of channel conveyance in Pottsburg Creek and installing a .75 acre wet detention facility for water quality treatment. This project will contribute to the pollutant load reduction required by the Lower St. Johns River (LSR) Basin management Action Plan (BMAP) and NPDES permit requirements. (Project PC-5A in MSMP)    | CIP<br>2021-505-E |                          | \$296,352   | \$3,600,000 | \$1,784,648 |           |             |            | Drainage 1.4  |
| Arlington/Pottsburg (Bowden & Belfort) Pond            | The intent of this project is to improve water quality by retrofitting and assuming responsibility for an existing 10 acre offline wet detention facility at the intersection of Belfort Road and Bowden Road. This project will contribute to the pollutant load reduction required by the Lower St. Johns River (LSR) Basin management Action Plan (BMAP) and NPDES permit requirements. (Project PC-6A in MSMP)        | CIP<br>2021-505-E |                          |             |             |             |           | \$1,815,352 | \$115,498  | Drainage 1.4  |

Ordinance 2022-120-E  
FY 2022-2026 Capital Improvements Element (CIE) Schedule

| Project Name                          | Description  | Source                  | FY 20-21                 | FY 21-22 | FY 22-23 | FY 23-24 | FY 24-25    | FY 25-26    | Beyond 5th   | Element, Goal,<br>Objective Showing<br>Comp Plan<br>Consistency |
|---------------------------------------|--|-------------------------|--------------------------|----------|----------|----------|-------------|-------------|--------------|---|
|                                       |  |                         | Amendments<br>to the CIP |          |          |          |             |             |              |   |
| Duval Road (Wet Detention Pond)       | This project addresses water quality and flood control within the Cedar Creek sub-basin. It includes construction of a 25-acre wet-detention facility. The RSF was designed as an off-line pond southwest of The I-295 Duval Road Exit Ramp with a retention period of 13 days, a maximum depth of 10 feet, a permanent pool volume of 274 ac-ft, and a total surface area (including maintenance buffer) of approximately 25 acres.       | CIP<br>2021-505-E       |                          |          |          |          | \$3,484,502 | \$3,600,000 | \$2,445,498  | Drainage 1.4  |
| Hogan's Creek Stormwater Improvements | This project will design and implement a stormwater treatment plan for Hogan's Creek to help address the creek's water quality and lack of treatment. This would also help to decrease fecal coliform contamination and promote recreational access and utilization. This system could include the use of "flexflow" to protect downstream public health and improve aquatic biology in Hogan's Creek and potentially the St. Johns River. | CIP<br>2021-505-E       |                          |          |          |          |             |             | \$33,000,000 | Drainage 1.4  |
| Lower Eastside Drainage-01            | This project includes the design, permitting, right-of-way acquisition and construction of drainage improvements for flood reduction in the area bounded by Spearing Street on the west, 7th Street on the north, Martin Luther King Drive on the east, and 1st Street on the south. During this phase, the remaining Lower Eastside neighborhood's collection system will be addressed.   | CIP Amend<br>2021-348-E |                          |          |          |          |             |             |              | Drainage 1.4  |

**Path Forward 2045 –Adopted 2045 Cost Feasible Plan Projects**

2045 Long Range Transportation Plan Adopted by the North Florida TPO on November 14, 2019

# Path Forward 2045

## ADOPTED 2045 Cost Feasible Plan

### Other Arterial Funds

Shown in Present Day Costs

Adopted by the North Florida TPO on November 14, 2019

Other Arterial funds fund improvements on the part of the State Highway System (SHS) that is not designated as part of the Strategic Intermodal System (SIS)

Projects and programs eligible for funding include:

- Construction and improvement projects on state and federal roadways which are not on the Strategic Intermodal System (SIS), including projects that:
  - Add capacity;
  - Improve highway geometry;
  - Provide grade separations; and
  - Improve turning movements through signalization improvements and storage capacity within turn lanes.
- Acquisition of land which is acquired to support the SHS highway and bridge construction programs, and land acquired in advance of construction to avoid escalating land costs and prepare for long-range development;
- Construction and traffic operations improvements on certain local government roads that add capacity, reconstruct existing facilities, improve highway geometrics (e.g., curvature), provide grade separations, and improve turning movements through signalization improvements and adding storage capacity within turn lanes; and
- Acquisition of land necessary to support the construction program for certain local government roads, as discussed immediately above.

# Path Forward 2045

## ADOPTED 2045 Cost Feasible Plan

### Transportation Management Area (TMA) Funds

Known as SU Funds in the Work Program

Shown in Present Day Costs

Adopted by the North Florida TPO on November 14, 2019

- TMA funds may be used on State, Federal and Local Roadways including projects that:
  - Add capacity;
  - Improve highway geometry;
  - Provide grade separations; and
  - Improve turning movements through signalization improvements and storage capacity within turn lanes

Ordinance 2022-120-E

## ADOPTED 2045 Cost Feasible Plan

### Transit Funds

Shown in Present Day Costs

Adopted by the North Florida TPO on November 14, 2019

These funds may only be used for transit capital projects. This may include:

- Transit projects and programs
- Funding for local or regional bus systems and system expansion

Two tables are shown on the following page. The top table includes projects that are expected to receive funding through the Long-Range Transportation Plan (LRTP). The bottom table lists the remaining transit projects which will compete for Federal Transit Agency (FTA) discretionary grant funds.

# Path Forward 2045

## ADOPTED 2045 Cost Feasible Plan

### Strategic Intermodal System (SIS) Funds

Shown in Present Day Costs

Adopted by the North Florida TPO on November 14, 2019

The Strategic Intermodal System (SIS) is Florida's high priority network of transportation facilities important to the state's economy and mobility. The Governor and Legislature established the SIS in 2003 to focus the state's limited transportation resources on the facilities most significant for interregional, interstate, and international travel. The SIS is the state's highest priority for transportation capacity investments and a primary focus for implementing the Florida Transportation Plan (FTP), the state's long-range transportation vision and policy plan.

SIS funds may be used on the following types of projects:

- Construction, improvements, and associated right of way on SIS highways (i.e., Interstate, the Turnpike, other toll roads, and other facilities designed to serve interstate and interregional commerce including SIS connectors).

# **Path Forward 2045**

## **ADOPTED 2045 Cost Feasible Plan**

### **Bridge Replacement Program**

Adopted by the North Florida TPO on November 14, 2019

This proposed program would create a new bridge discretionary grant program, administered by the U.S. Secretary of Transportation, to improve the nation's bridge conditions by leveraging state, local and private funding sources.

| Facility           | County | From       | To         | Improvement        |
|--------------------|--------|------------|------------|--------------------|
| Hart Bridge        | Duval  | South Bank | North Bank | Bridge replacement |
| Mathews Bridge     | Duval  | South Bank | North Bank | Bridge replacement |
| Main Street Bridge | Duval  | South Bank | North Bank | Bridge replacement |

These bridges are being included in the LRTP for potential funding under the new Bridge Investment Program that is included in the proposed transportation reauthorization proposal - the "America's Transportation Infrastructure Act of 2019"

**Jacksonville Transportation Authority (JTA) Projects identified in the CIP**  
**(Ordinance 2021-505-E)**

All projects listed on the following pages show consistency with the Transportation Element Objective 4.1, Goal 6, Objectives 6.3, 6.5, 6.6 or the Recreation and Open Space Element Objective 4.1 of the Comprehensive Plan.

## **2030 COMPREHENSIVE PLAN**

# **CAPITAL IMPROVEMENTS ELEMENT**

**B**

## **DEFINITIONS**

---

**JACKSONVILLE PLANNING AND DEVELOPMENT DEPARTMENT**

### **DEFINITIONS**

*City of Jacksonville 2045 2030 Comprehensive Plan  
Capital Improvements Element  
Revised April 2019*

**Annual General Fund debt service** — The debt service expenditures that are funded by the General Fund

**Capital Budget** — The portion of each local government's budget which reflects capital improvements scheduled for a fiscal year.

**Concurrency** — With regard to the provision of facilities and services, the assurance that, with the exception of transportation, the necessary public facilities and services to maintain the City's adopted level of service standards are available when the impacts of development occur.

**Concurrency Management System** — The procedures and/or process the City will use to assure that development orders and permits when issued will not result in a reduction of the adopted level of service standards at the time the impact of the development occurs.

**Connectors/Loopers** — Suburb to suburb route

**Development Area** — An area depicted on the FLUM series which controls the density, development characteristics, and other variables within plan categories. The City is organized by five tiers of Development Areas including: the Central Business District (CBD); the Urban Priority Area (UPA); the Urban Area (UA); the Suburban Area (SA); and the Rural Area (RA).

**Direct Net Debt** — The amount of debt excluding self-supporting debt

**Express Route** — A limited stop service

**Infrastructure** — Those man-made structures which serve the common needs of the population, such as: sewage disposal systems; potable water systems; potable water wells serving a system; solid waste disposal sites or retention areas; stormwater systems; utilities; piers; docks; wharves; breakwaters; bulkheads; seawalls; bulwarks; revetments; causeways; marinas; navigation channels; bridges and roadways.

**Interliners** — Routes that provide through service within Downtown; two radial routes that have been combined to reduce transferring Downtown to another bus.

**Mobility Plan** — Refers to the 2030 Mobility Plan, adopted by reference.

**Mobility Score** — A measurement to determine the average quality of service of the Mobility Plan within each Mobility Zone. The Q/LOS value for each mode of transportation will be weighted based on location and need of each Mobility Zone so as to arrive at a Mobility Score for each Mobility Zone. A city-wide Mobility Score will also be determined from the average scores of all Mobility Zones.

**Mobility Strategy Plan** — Refers to the document, which describes the background and

City of Jacksonville 2045 2030 Comprehensive Plan  
Capital Improvements Element  
Revised April 2019

~~land use and transportation strategies of, and rationale behind, the City's Mobility System. The document is adopted by reference.~~

**Mobility System** — A process for calculating and collecting a fee from landowner's or developer's for a specified development; and for applying this fee to motorized and non-motorized transportation projects in order to mitigate the effects of increased demand due to growth.

**Mobility Zone** — Defined geographic areas within each Development Area that are delineated so that their area is approximately equal to the average trip length of the underlying Development Area.

**Motorized Mode** — Includes roadway/corridor, transit, and Downtown Investment Authority (DIA) transportation improvement projects.

**Non-motorized Mode** — (also known as Active Transportation or Human Powered Transportation) Includes walking, bicycling, skating, skateboarding, and wheelchair travel. These modes provide both recreation and transportation (access to goods and activities).

**Public Facilities** — Major capital improvements, including, but not limited to, transportation, sanitary sewer, solid waste, drainage, potable water, educational, parks and recreational, and health systems and facilities, and spoil disposal sites for maintenance dredging located in the intracoastal waterways, except for spoil disposal sites owned or used by ports listed in s.403.021(9)(b).

**Quality/Level of Service (Q/LOS)** — An indicator of the extent or degree of service provided by, or proposed to be provided by a transportation facility based on and related to the operational characteristics of the facility. As it relates to traffic circulation, Q/LOS is a qualitative measure describing operational conditions within a traffic stream; generally described in terms of such factors as speed and travel time, freedom to maneuver, traffic interruptions, driver comfort and convenience, and safety.

**Radial Lines** — All bus routes that connect to a Downtown central hub; Westside, Southside, Northside and Beaches routes that terminate Downtown.

**Rural Area** — The predominantly undeveloped portions of the City in the areas that generally remain unplatted. Development in these areas tends to be at very low densities and intensities, thus creating little demand for community serving supporting uses. Widely spaced roads typify the area, and result in a small number of intersections per square mile. The area of the City not intended to be developed with urban services or at urban densities and intensities during the long range timeframe of the 2030 Comprehensive Plan.

**Services** — The programs and staff determined necessary by the City to provide adequate operation and maintenance of public facilities and infrastructure, as well as

~~those educational, health care, social and other programs necessary to support the programs, public facilities and infrastructure set out in the 2030 Comprehensive Plan, or required by local, State or federal law.~~

*Shall* - The term used to indicate mandatory action.

*Should* - The term used to indicate an action that is strongly advised.

*Shuttle/Trolley* — A special service that serves niche markets, i.e. Riverside Trolley, Stadium Shuttle service

*Suburban Area* - The urbanizing portions of the City in areas that have usually been developed since 1960. Development tends to be at single family residential densities, although multi family developments may occur near major intersections or on the peripheries of neighborhoods near transit corridors. Curvilinear street patterns typify these areas, and result in a moderate number of at-grade intersections per square mile. Suburban areas generally constitute the less densely developed portions of the City that have developed or are developing beyond the urban area in the low density and intensity exclusive use patterns characteristic of post WWII communities. Suburban areas do not include lands designated for use under the Agriculture (AGR) land use plan category.
