This schedule contains the vehicles that will be replaced in FY20 as approved by Council. In order to receive the replacement vehicle the "old vehicle" as stated here by vehicle number must be turned in. Fleet Management has the option to keep turned in patrol vehicles on the City cap to be used exclusively for JSO wreck replacements and to keep JFRD apparatus on the City cap for one fiscal year for various purposes. Any changes to this schedule will have a financial impact in FY20. Fleet Management maintains all related documentation pursuant to section 106.216.

| Program Name | Description | FY20 Proposed |
|-----------------|---|------------------|
| STD | This program is responsible for investigating, educating and treating individuals within our community who have been exposed to a sexually transmitted disease. This program employs Disease Intervention Specialists (DIS) whose task is to investigate reports of STD exposure. More specifically, this program is called to investigate the source and spread of disease in our community with a focus on pregnant women and teenagers. Our division of communicable disease control tasks DIS to perform investigations that determine the source and spread of disease. These DIS take steps to then intervene and prevent additional individuals in our community from becoming infected with a STD or HIV. This program also works with private providers to ensure all providers and laboratories that diagnose and treat an individual for a sexually transmissible disease also report the information in an appropriate and timely manner. Program also offers treatment for those who have tested positive for STD's in our community. Our clinical staff offers treatment for all individuals or partners of individuals who have tested positive for a STD. | 147,000 |
| Immunizations | This program offers vaccines to the community for various infectious diseases which include measles, mumps, rubella, pertussis, diphtheria, tetanus, polio, varicella, pneumococcal disease, hepatitis A, hepatitis B, influenza, meningococcal and Haemophilus influenza type b (Hib). These common childhood and adult diseases are easy to spread from one person to another. They are particularly dangerous to very young children who have low resistance to infection and are more likely to develop serious problems such as deafness, retardation, brain and spinal cord damage and, occasionally, death. The diverse population receiving immunizations at our center are offered services on a scheduled and walk-in basis. The South Jacksonville Immunization Center continues to be a valuable source of immunizations, information, and education. This site is particularly vital as we see an increase in the number of medical providers who either no longer offer immunizations or do so only in a limited capacity. | 258,292 |
| HERAP | This is a clinic-based case management and education program designed to improve health outcomes for uninsured, underinsured, and low-income residents of our community. This program provides case management and education services to HIV clients. Nutritional counseling is also provided for these clients. Self-Management workshops (diabetes and chronic disease aka Living Healthy Workshops) are taught by our qualified staff in conjunction with our community partner AHEC in the community. Additional services provided by this program includes: Nutrition counseling for diabetes, hypertension, hyperlipidemia and obesity; Case management services; Outreach events (B/P and diabetes screenings); and A New DEAL Diabetes Program of the Florida Department of Health in Duval County provides diabetes self- management education workshops that are accredited by the American Association of Diabetes Educators. | 350,243 |
