PURPOSE: White Paper (Explain why this legislation is necessary. Provide, who, what, when where, how and the impact.) Council Research will complete this form for Council introduced legislation and the Administration is responsible for all other legislation. (Minimum of 350 words – Maximum of 1 page)

The developer is proposing the development of a multifamily garden apartment project located at 14670 Duval Road utilizing 18.88 acres in the JIA CRA boundary area. The project will consist of 3-story buildings with 324, one, two and three bedroom apartment homes and detached parking. This type of product, the first of its level in this underserved area, includes high-end amenities such as a resort size pool, cabanas, activity lawn with outdoor yoga/fitness space, dog park and pet spa, boardwalk and trail, electric car charging, remote workstations and a state of the art fitness center. Construction start is estimated during the second quarter of 2021.

The improvements to Ranch Road will include removing the existing asphalt and base material, and installing a new road base material and asphalt, with a 1' wide concrete ribbon installed on either side of the roadway. Additionally, the slopes of drainage ditches will be dressed and sodded, and the bellies of the ditches will be re-graded to improve drainage flow. Finally, vegetation will be removed to open the view corridor along the road. Overall, the improvements will bring this section of Ranch Road to City standards, improve the appearance of the roadway and surrounding areas, and improve the safety and functionality of the roadway.

The city will be providing a TID Infrastructure Development grant of \$250,000, to be disbursed once the project infrastructure is complete. This program is designed to attract economic development to CRA areas of the city by providing infrastructure improvements to create opportunities for businesses that will generate new jobs and increase the tax base within the CRA.
